OMPANY C IN CAMP LINCOLN NEAR SPRINGFIELD ONE WEEK Editress Saturday Herald:

Thinking some of the friends of Company C would like to hear of the doings of the company while at camp; in Springfield, I wish you would publish this statement that they who will may read and learn,

We arrived in Springfield at 7 a, m Saturday, Aug. 12, aud after a break fast of coffee, meat and bread, pitched camp and policed (cleaned up) our quarters and were in shape before many of our older companies were Nothing else doing till parade by the regiment at 6:30 p m, when to use the words of our Colonel, the Regiment gave the tottenest parade he had ever seen. It was the last rotten parade of the camp.

Sunday was compulsory attendance at church and inspection of quarters and lectures on sanitation with regimental parade again at 6:30, much better than the preceding day, but to give a detailed account would take too much space.

We were called from dreams of home and loved ones at 5 a. m .exercises for ten minutes before breakfast, the tents neatly arranged and the grounds policed well before start attoracy. ing to drill at 7:20, which drill was continued till 11:15. Dinner at 12:00. Supper at 6:00. Parade at 6.30 and iights out at 10:30, when check roll was held to see if all men were in

Company C was not on guard at all while at camp. Company C did not have a man picked up by the outer guard or in any trouble while up in the city. Not a man in the hospital and only two were sent to the guard house from the camp and their offenses were slight.

Now to arrive at the benefit received rom the Camp which was one of instruction. Major Muir of the 23rd Infantry, Regular Army, who was detailed to camp for instructions informed me on Friday evening that he execution of the manual of arms by Company C was better than that of any other company in the regiment. Col. Lang informed the company that at the present they were as good as any company in the reciment and that if they continued to show im provement as they had done that they would go to camp next year The Pride of the Regiment." We had the straightest line of any com company in the regiment in the parade past the Governor, also at parade that evening and again Friday evening, as informed by the adjutant of the regiment.

Company C went to camp with 3 officers and 60 men, the newest and largest company, both in size and number of any company in the regi ment and were an honor to Sullivan and Moultrie county. Their behavior was better than the rest and their ken all in all it was Company C. Between the 10th and as yet, we expect to dedicate the Armory to the use of the company by appropriate services when we expect with us. Our home people are all welcome. Everybody is welcome at all-drills, and your presence is an aid Let ali friends of the company give us a good word. Drill night has been changed to Tuesday night.

Respectfully, W. E. SCARBOROUGH. Capttain 4th Inf.

ENDS LONG VIGIL

SKELETON OF WILLIAM SCHORR, IN LOVE WITH COUSIN, IS REVEALED IN LAKE.

SHOT RICH FARMER'S SON

Man for Whom Schmid Patroller Fields Died Two Months Ago Rifle Is Found Near Body of Probable Suicide.

Woodriver, Ill.-A feud growing out of the love of William Schorr for his cond cousin. Miss Ida Schmid of Woodriver, ended in the finding of the skeleton of Schorr, who, two months ago, wounded Gustav Schmid, brother of the girl. It is believed Schorr killed himself.

The skeleton, identified by a watch found in the clothes about it, was discovered in Grassy Lake, only a few yards from the spot where Schorr, from ambush, shot Schmid June 21.

Berthold Schmid, the girl's wealthy father, who, after the shooting, began to patrol the farm armed with a shotgun, upon hearing of the finding of the body, discarded the weapon and announced the feud ended.

The body had been under water for almost two months. The lowering of the lake water line, due to the construction of a drainage canal, revealed the clothed skeleton. Nearby was the rifle with which Schorr had wounded Schmid.

Reward Had Been Offered.

The discovery brought to an end a vigil by the elder Schmid, who had offered a reward of \$500 for the capture of his son's assailant. It also ended search by Schorr's relatives, who had hoped to find him and prove the provocation had been on the other

About two years ago Schorr came from his father's farm near Durant, fa., to Schmid's farm in the American bottoms near Woodriver. Schmid is rated as one of the wealthiest farmers in that section of Illinois. Schorr is a second cousin tf Schmid's children, and when he was presented to the 17-year-old daughter he became inatuated with her.

Remarks that Schorr is alleged to have made about the Schmid family led to a quarrel in Woodriver with Gustav Schmid, 30 years old, eldest son of Berthold Schmid. Schorr is said to have promised to "get eyen." Shoots Girl's Brother.

On June 21 as Gustave and his brother Frank were working in a wheat field adjoining Grassy lake, Schorr is alleged to have crept up behind a sheaf of wheat and lain in wait for Gustave. As the latter bent down to cap a sheaf Schorr is said to have fired a short which pierced his

lung. Another shot was fired at Frank, after which the assailant fled toward the lake. Both of the Schmid sons declare they recognized Schorr.

Gustave Schmid only recently recovered from his wound.

Money

By Dr. Frank Crane

Since the dawn of preaching we preachers have been threatening rich men with our right fist—and extendly to be wondered at that we find dif-faculty in being taken seriously.

And our advice has been so confus-

and our advice has been so contusing that we have not had much effect.
For now we exhort the youth to all
the virtues, giving as an inducement
the assurance that thus they will be
enabled to get on; and now again we
turn to those that have gotten on and warn them of the danger of riches. It might as well be asked, if riches be dangerous, why acquire them; and it virtues lead to riches, are they really worth cultivating?

It may be well, therefore, to se down a few common sense facts in re riches and the relation of the same to

the moral values.

In the first place, money is simply the token or sign of our common human wants. It means power, power over others, power to make our per-

sonality felt. No wonder we want it. Again it means liberty. Poverty is a curse. It ties the hands. It binds the mind. It narrows the soul. One who has to sweat ten hours a day for bread has no time nor strength left

to develop the higher part of himself. Money means also a full life. We can gratify our cravings, whether they be for beer or art, for Paris gowns or Wagner music. With money we have a chance to grow; without it we are stunted.

Money, therefore, is simply concentrated—we might say canned—human value.

It naturally follows that it is good or bad, never of itself, but only as ing opportunity to its possessor. Here, then, we have the moral gist of the whole matter: money is simply-op-

portunity.
It unlocks the door and bids the cramped and chafing passion go and do its will. It liberates desire. it simply emphasizes a man. If he is good he can now be better, having more scope; if bad he can, and probably will, be worse. If idle and useless, he becomes a living fountain of idleness and uselessness, poisoning

So, money is like any other gift; as beauty, which adds power to the person; or genius, which multiplies the efficiency of the mind and hand; or position, for kinship magnifies a common man to heroic proportions, in his influence on other men.

Now, the sole relation of morals to power of any kind is this: that the moral sense adds to power—responsi; bility.

The root of any genuine moral feeling is altruism. Given any desire, it becomes moral as it takes a direction toward the welfare of other people; it is immoral exactly in proportion as it disregards others and looks only to

Wicked people, therefore, are those who live, think, and do for self alone; and that whether poor or rich, Who-ever says, "I would like to be rich, for I could do so much good with my money," should examine himself and ask what good he is doing with the little he has. It's all a matter of re-lation. If one is not helpful and liberal on \$40 a month, he would not be so on \$4,000 a month.

In the ultimate realm of morals there are no commandments; there is only one test-do I live for myself or for others; am I altruistic or egocen-

The dawdling smart set, flitting from bridge to matinee, from theater to bedizened restaurant, from the club to the horse race, are wicked; but no wickeder than the better poor who want to lead such a life, and who curse their lot because their selfishness is bound and chained.

To the real man, therefore, riches means nothing at all, as to his character; 4t simply means an opening to give vent to his character. And a clear-eyed soul, that sees and realizes what responsibility means, is never eager for power and opportunity. It is easier to be good in moderate means than in riches for the principal reason that it is easier to bear a small than a great load of responsibility. "It is hard for a rich man to enter the king dom of heaven," just because a rich man to be moral must be great. And, unfortunately, great souls are scarce among great fortunes.

The greatness of Jesus was not in his wisdom, magnetism, nor ethical perception, but in the fact that he was utterly altruistic; that is, he used all his powers not to advance himself but to help others. His termenters up wittingly told the truth, and stated unknowingly his very secret, when, as he hung on the cross, they wagged their heads at him and cried;

"He saved others; himself he car not save!"

Working for Eternity.

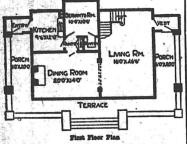

Never mind where your work is. Never mind whether it be visible or not. Never mind whether your name is associated with it. You may never see the issues of your tolls. You are working for eternity. If you canno see results here in the hot working day, the cool evening hours are draw ing near, when you may rest from your labors, and then they may follow you. So do your duty, and trust God to give the seed you sow, "a bedy as it hath pleased him."—Dr. Alexander Maclaren.

If I were asked to sum up in a few words the advantages of owning a home over renting one, I am afraid could hardly confine myself to the space allotted me for this article. But there are a few points that perhaps stand out with special prominence; and I will try to express as briefly as possible the reasons why, as it appears to me, the man who saves to build or buy a home for himself is the type of citizen of highest value to the commu-

For the man of average income, the acquisition of a permanent home involves struggle—and, it may be, even sacrifice—for a few years; but he who is willing to undergo it, instead of shrinking continually in fear, demon strates that he has the very qualities that make for success; and that is a large part of the battle. The man who owns his home can keep up to a bet ter standard of living than if rent day took one-third to one-fourth of his in come. The saving of the home-owner gives him a permanent buying powe

that the renting family seldom has: he is perpetually solvent instead of dependent. He not only has better credit, but has every reason to live up to moral and material standards that make him a more desirable citizen than the transient renter. Ownership of the place one lives in is the first step toward financial stability and

community respect. It is the fountain spring of that sincere and honest pride in home and family which is one of the strongest elements in character building for both parent and children. It inspires business sense, and atimu-lates the cardinal virtue of thrift. It fosters an interest in public affairs— reasonable taxation, street and sidewalk upkeep, honesty of officials, etc. that is very apt to be deficient or entirely lacking in the mere renter. Disreputable gang control is practically impossible in communities

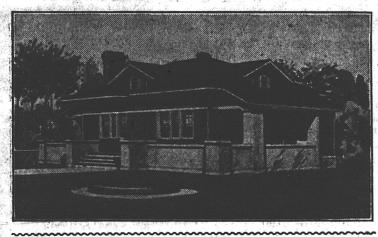

where people own their homes. Na thaniel Cotton sums up this subject admirably in the following lines:

"If solid happiness we prize, Within our breast this jewel lies, And they are fools who roam.

The world has nothing to bestow;

From our own selves our joys must flow,
And that dear hut, our home."

An example of an attractive little home that can be built for about \$2,500 is illustrated in the accompanying perspective and floor-plans. dimensions are: Length, 31 feet 6 inches; width, 53 feet 6 inches. It is of the popular "bungalow" type, but has two bedrooms and bath on the second floor. A wide veranda runs around three sides. There are two entrances, one on each side at the back and end of the veranda. The greater portion of the ground floor is given up to the waking comforts of real home life. A large living room stretching from front to rear at the right connects through a cased opening with a commodious dining room extending across the remainder of the front of the house. At the end of the dining room is a large fireplace and inviting hearthstone. A servants' room is provided, opening off the same passageway which connects the dining room and kitchen.

Sleep should be invigorating, not enervating, and the following theory was advanced by a man who, in his earlier days, had slept for many months under the stars in field and

jungle:
"It is the mattress and the pillow that are responsible for half the trou ble of the insomniac. The ideal rest ing place is the ground, with its nat ural covering of soft grass. The next most comfortable bed is a wood floor overlaid with a soft carpet or rug. The yielding mattress does not rest the muscles, which remain all night in a condition of alternating relaxation is fixed and hard they adapt them-selves to it and remain quiescent.

"Furthermore, the spine and nerv centers of the bed sleeper are exposed all night to the heat of the mattress which is the cause of the sense of en ervation so commonly felt when one

"The pillow is even more enervat ing than the mattress. A well stuffed saddle, whose cleft center permits the circulation of air, soft, yet unyielding, is the ideal head rest.
"When the discomfort of the experi-

ment has been overcome by a few nights of perseverance, a wonderful improvement will be discerned in the quality of sleep."—Harper's Weekly.

Ten Thousand Elephants Slaughtered Yearly to Meet the Demand for the Product.

In spite of the great demands of the arts and trades for ivory, the quan tity imported at Antwerp, London and Liverpool, the principal markets of the world, remains almost constant. The total was 484 French tons in 1888 and 469 tons in 1908. In the years between it has been as high as 688 tons, in 1900.

Antwerp was unknown as an ivory market 20 years ago, but now sur-passes London in the size of its trade, owing to the opening of the Congo Occasionally tusks are found weigh

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure nov known to the medical fraternity. Catarrh being a constitutional disease, requires a con stitutional treatement. Hall's Catarrh Cure is taken laternally, acting directly upon the blood and mucous surfaces of the system thereby destroying the foundation of the disease, and giving the patient straegth by building up the constitution and assisting nature in doing its work. RESOLUTIONS OF RESPECT

To the members of Moultrie Lodge No. 222, Knights of Pythias.

We, the undersigned committee appointed to draft resolutions relative to the death af brother William I Warren, submit the following:

WHEREAS, the messenger of death has removed from our midst our esteemed brother knight, William J. Warren, and whereas brother Warren was a taithful Pythian, devoted to the principles and teachings of our order, and by his daily life and his relations with his brother knights endeavored to exemplify the principles of Pythianism; and whereas, by his death we have lost an earnest Pythian knight, his home a kind father, the community a public spirited and honorable citizen; BE IT THEREFORE RESOLVED, That the charter of Moultrie Lodge, No. 222, Knights of Ppthias of Sullivan, Ill., be draped in mourning for a period of 30 days; that a copy of these resolutions be spread upon the records of the lodge; that a copy be sent to the grief stricken widow of our deceased brother knight,

If you keep your farm because it has always been in your family, or because you are unwilling to leave the neighborhood where you were born and raised—that is sentiment. It's all right, too, and if we could afford it we might feel that way

But if you keep your farm as a business proposition pure and simple—if you're out after the dollars, and feel that you can't afford to sacrifice profit for sentimental reasons—then you are the man we want to talk to.

We have a proposition to put up to just that kind of mento men who want their capital of money and labor to return the highest income possible; and who are willing to exchange farms that barely pay for the labor expended on them for farms that will do that and pay a good cash income on their cost besides.

We want to talk to the level-heard business farmers—the ones who figure the value of land on the basis of income produced. They are the ones who will be interested in

SOUTH CENTRAL MINNESOTA

SOUTHEAST'N NORTH DAKOTA

where well improved farms, that can be bought at \$60 to \$90 an acre, pay a greater income per acre than the \$150 to \$250 land of the Central States. In other words, the capital tied up in the land you now own will make you two to three times as much clear money if invested in a Minnesota or North Dakota farm. Just as nice a country to live in too-highly improved; good neighbors; good climate; good markets, roads, schools, churches, etc.

Let us send you our Northwestern Catalogues that tell all about these sections. When you have read them you'll want to see the country; and when you see the country you'll want to own a farm—and there is where we come in, with 180 of the chociest farms for you to selecet from.

Domestic Science in S The principal of the Si school of New Jersey will not permit a domestic science course in that institution, claiming that domestic science could be better taught in the es than in the schools. He inists that the mothers should do such , and that girls who are old ough to go to normal school should know how to cook, and be already cossessed of such knowledge as a omestic science course is supposed to teach. He said it is a matter of regret that mothers take so little interest in teaching their daughters to do home work. To know how to rook and do housework is certainly as much a part of a girl's education embroidery and other ornamentals lancy work. A girl should know low to use the needle in the way of keeping the wardrobe in repair, and this can hardly be thoroughly tearned at school. Like cooking with the ordinary family supply of kitchen utensils, such things can only be learned by experience. But it is a sad fact that most mothers are not, themselves, well versed in such things, and the girls would not have to know much is order to know more than the average mother. Where a course of teaching is given in the schools, the girls are taught to look upon the work of the household from a scientific standpoint, and this will develop an interest in the work that would not otherwise be awakened. It would be much better if the little girls were started in the lessons while yet to young to think they must spend all their spare time in running about seeking recreation and "being amused."

DEGENERATION

Idocy is a matter of heredity. Many cases which have been traced have uncovered some terrible proofs says the Peoria Star

More than a century ago, a young man of a proud family, wronged a feeble minded girl in an eastern village. Then he went his way, married a girl of a fine family, reared in 1837. But the feeble minded girl gave birth to a son of teeble mind. This one became the father of thirteen

children several of whom were idiots. The busy world didn't pay any attention to the terrible thing that was going on. One of the feeble minded sons married a feeble minded woman, No one stopped them They brought eleven children into the world. One of their idio: daugh ers lived with four or five different men and bore twelve children. In this line of horrors is a little girl of to,

who has the mind of a child of 2 years. All men and women whose marriage would produce defective children, should be segregated from their kin, or a surgical operation performed upon them that would make them sexless. Through this feeble minded girl, this youth who wronged her was the ancestor of 1146 human beings. Of this number the records of 580 could not be traced. But from this one illegitimate offspring came 262 feeble minded persons, 3 epileptics and only 157 normal beings.

Something in the man's face had rought Amber to his feet, a prey to inexpressible concern; it was as if a mask had dropped and he were look ing upon the soul of a man in mortal

Rutton seemed not to hear; Ambergot his answer from the door, which was swung wide and slammed shut. A blast of frosty air and a flurry of snow swept across the room. And against the door there leaned a man puming for breath and coughing spasmodically—g gross and monstrous bulk of feek, unclean and unwholesome to the eye, attired in an extravarant array of colored garments, agant array of colored garments, tawdry silks and eatins clinging, sod-den to his ponderous and unwieldy limbs.

"The babu!" cried Amber unconsc ously; and was rewarded by a flash of recognition from the coal-black,

of recognition from the coal-black, beady, evil eyes of the man.

But for that involuntary exclamation the tableau held unbroken for a space; Rutton standing transfixed, the torn halves of the cigarette between his fingers, his head well up and back, his stare level, direct, uncompromising, a steady challenge to the intruder. truder.

Then, demanding Amber's silence with an imperative movement of his hand, Rutton spoke. "Well, babu?" he said quietly, the shadow of a bitter and weary smile curving his thin,

The Bengali moved a pace or two from the door, and plucked nervously at the throat of his surtout, finally managing to insert one hand in the folds of silk across his bosom.

"I seek," he said distinctly in Urdu, and not without a definite note of menace in his manner, "the man calling himself Rutton Sahib?"

Very deliberately Rutton inclined his head. "I am he." "Hazoor!" The babu laboriously doubled up his enormous body in profound obeisance. Having recovered, he nodded to Amber with the easy familiarity of an old acquaintance. "To you, likewise, greeting, Amber Sahib."

"What!" Rutton swung sharply to Amber with an exclamation of amazement. "You know this fellow, David?"

The babu cut in hastily, stimulated by a pressing anxiety to clear himself. "Hasor, I did but err, being misled by his knowledge of our tongue as well as by that pale look of you he wears.
And, indeed, is it strange that I should
take him for you, who was told to
seek you in this wild land?"

"Be silent!" Rutton told him an

grily.

"My lord's will is his slave's." Resignedly the babu folded his fat arms.

"Tell me about this," Rutton demanded of Amber.

"The ass ran across me in the woods south of the station, the day I came down," explained Amber, summarising the episode as succinctly as he could. "He didn't call me by your name, but I've no dobut he's telling the truth about mistaking me for you. At all events he hazor-ed me a num-ber of times, talked a lot of rot about some silly 'Voice,' and finally made me a free gift of a nice little bronze box that wouldn't open. After which he took to his heels, saying he'd call later for my answer—whatever he meant by that. He did call by night and stole the box. That's about all I know of him, thus far. But I'd watch out for him, if I were you; if he isn't a raving lunatic, I miss my guess."

"Indeed, my lord, it is all quite as the sahib says," the babu admitted graciously, his eyes gleaming with sardonic amusement. "Circumstances conspired to mislead me; but that I was swift to discover. Nor did I lose time in remedying the error, as you

He shut up suddenly at a sign from Rutton, with a ludicrous shrug of his huge shoulders disclaiming any ill-intent or wrong-doing; and while Rutton remained deep in thought by the table, the babu held silence, his gaze flickering suspiciously round

At length Rutton looked up, suppressing a sigh. "Your errand, babu?" "Is it, then, your will that I should peak before this man?" The Bengali

nodded impudently at Amber. "It is my will." "Shabash! I bear a message, ha-

"The Body wears strange members that employs you, babu," commented Rutton bitterly. "It has fallen upon evil days when such as you are charged with a message of the Bell."

"My lord is harsh to one who would be his slave in all things. Fortunate indeed am I to own the protection of the Token." A slow leer wieened greasily upon his moon-like face

"Ah, the Token!" Rution repeated you have the Token?

Without answering Rutton turned the box over in his paim, his slender fingers playing about the boxses of the relief work; there followed a click and one side of it swung open. The Bengali fell back a pace with a whisper of awe—real or affected; "The Token, hassor!" Amber himself grapped slightly.

Unheaded, the box dropped to the floor. Between Rutton's thumb and foreinger there blased a great emerald set in a ring of red old gold. He turned it this way and that, inspecting it critically; and the lamplight, catching on the facets, struck from it blinding shafts of intensely green radiance. Rutton nodded as if in recognation of the stone and, turning, with an effect of carelessness, tossed it to Amber.

tossed it to Amber.

"Keep that for me, David, please," he said. And Amber, catching it, dropped the ring into his pocket.

CHAPTER V.

The Geblin Night.

Amber whistled low. "Impossible!" he said thoughtfully.

Rutton had crossed to and was bending over a small leather trunk that stood in one corner of the room. In the act of opening it, he glanced over his shoulder. "What?" he de-

manded sharply.
"I was only thinking; there's so thing I can't see through in the ba bu's willingness to go." "He was afraid to stay."

"Why?"

"Why?"
Rutton, rummaging in the trunk,
made no reply. After a moment Amber resumed.

ber resumed.

"You know what Bengalis are; that fellow'd do anything, brave any ordinary danger, rather than try to cross that sandbar again—if he really came that way; which I am inclined to doubt. On the other hand, he's in-telligent enough to know that a night like this in the dunes would kill him.

Well, what then?"
Rutton was not listening. As Am ber concluded he seemed to find what he had been seeking, thrust it hur-riedly into the breast-pocket of his coat, and with a muttered word, unin-telligible, dashed to the door and

flung it open and himself out.

With a shrick of demoniac glee the

"Till We Meet in the Hall of The Bell. Good Night."

Rutton stood in stony apathy, his eyes lifted to a dim corner of the ceiling, his gaze—like his thoughts—perhaps ranging far beyond the dreary confines of the cabin in the dunes. Minute sign, the babu poised before him in inscrutable triumph, watching him keenly with his black and evil eyes of a beast. Amber hung breathless upon the issue, sensing a conflict of terrible forces in Rutton's mind, but comprehending nothing of their nature. Rutton awoke as from a sleep.

"The Voice has spoken, babu," he aid, not ungently, "and I have heard."

"And your answer, lord?" "There is no answer."

"I have said," Rutton confirmed. evenly, "there is no answer.

"You will obey?" "That is between me and my God. Go back to the Hall of the Bell, Behari Lal Chatterji, and deliver your report: say that you have seen me, that I have listened to the words of the Voice, and that I sent no answer." "Hazoor, I may not. I am charged to return only with you.

"Make your peace with the Bell in what manner you will, babu; it is no concern of mine. Go, now, while yet time is granted you to avoid a longer journey this night."

"Hazoor!" "Go." Rutton pointed to the door, his voice imperative.

He rolled sluggishly toward the door, dragging his inadequate over-coat across his barrel-like chest; and paused to cough affectingly, with one hand on the knob. Rutton eyed him

"If you care to run the risk," I said suddenly, "you may have a chair by the fire till the storm breaks, babu."

"Beg pardon?" The babu's eyes "The man he came here to hide widened. "Oah, yess; I see. "It is from," said Amber.

"I knew 'e was tryin' to dedge of you, I'm sure. But as we say in somethin', sir; but 'e never tols me hangal, these favor of hings iss ass a sught about it. What kind of a per-

a tense wait ensued, none speaking, I wind entered into and took possession of the room. A cloud of snow swept across the floor like a veil. The door battered against the wall as if trying to break it down. The cheap tin kero sene lamp jumped as though caught after minute passed, he making no up by a hand; its flame leapt high and ign, the babu poised before him in blue above the chimney—and was not. In darkness but for the fitful flare of the fire that had been dying in embers on the hearth, Amber, seeking the doorway, fell over a chair, blundered the wall, and stumbled unexpectedly out of the house.

His concern was all for Rutton; he had no other thought. He ran a little way down the hollow, heartsick with horror and cold with dread. Then he paused, bewildered. Whither in that whirling world Rutton might have wandered, it was impossible to surmise. In despair the Virginian turned back

When he had found his way to the door of the cabin, it was closed; as he entered and shut it behind him, a match flared and expired in the middle of the room, and a man cursed brokenly.

"Rutton?" cried Amber in a flush "Is that you, Mr. Amber? Thank Gawd! Wyte a minute."

A second match spluttered, its flame waxing in the pink cup of Doggott's hands. He succeeded in setting fire to the

wick. The light showed him barefoot and shivering in shirt and trousers. "For pity's syke, sir, w'at's 'appened?"

"It's hard to say," replied Amber
vaguely, preoccupied. He went im-

vaguely, preoccupie mediately to a window and stood there, looking out. "But w'ere's Mr. Rutton, sir?"

"Gone—out there—I don't know just where." Amber moved back to the table. "You see, he had a caller." "A caller, sir—on a night like this?"

and 'at, sir?"

"No! he went suddenly. I don't think he intended to be gone long."

"I'd better go after 'im, then. 'E'll 'eve pneumonia. . . . I'll just jump into me clothes and—" He allyped into the back room, to reappear with surprisingly little delay, fully dressed and buttoning a long ulster round his throat. "You didn't 'appen to notice which wy 'e went, sir!"

"As well as I could judge, to the east."

Doggott took down a second ulstea and a cap from pegs in the wall. "The do my best to find 'im; 'e might loss 'imself, you know, with no light nor nothin."

The door slammed behind him. Alone, and a prey to misgivings he scarce dared name to himself, Am-ber from the window watched the blot of light from Doggott's handlamp fade and vanish in the storm; then, becom-ing sensible to the cold, went to the fireplace, kicked the embers together until they blased, and piled on more

fuel.

A cosy, crackling sound began to be audible in the room, sibilant jets of fame, scarlet, yellow, violet, and green, spurted up from the driftwood. Under the hypnotic influence of the comforting warmth, weariness de-scended upon Amber like a burden; he was afraid to close his eyes or to sit down, lest sleep should overcome him for all his intense excitement and anxiety. He forced himself to move steadily round the room, struggling against a feeling that all that he had witnessed must have been untrue, an evil dream, akin to the waking visions that had beset him between the loss of Quain and the finding of Rutton. The very mediocrity of the surroundings seemed to discredit the testimony of his wits. In a setting so hopelessly common-

place and everyday, one act of a drama of blood and fire had been played; into these mean premises the breath of the storm, as the babu enhad blown Romance. Incredible!

And yet Amber's hand, dropping idly in his coatpocket, encountered a priceless witness to the reality of what had passed. Frowning, troubled, he drew forth the ring and slipped it ne arew form the ring and slipped it upon his finger; rays of blinding emerald light coruscated from it, darsling him. With a low cry of wonder he took it to the lamplight. Never had he looked upon so fine a stone, so strangely and

strangely cut. It was set in ruddy soft gold, worked and graven with exquisite art in the semblance of a two-headed cobra; inside the band was an inscription so worn and faint that Amber experienced some difficulty in diciphering the word Rao (king) in Devanagari, flanked by swastikas. Aside from the stone entirely, he speculated, the value of the ring as an antique would have proven inestimable. As for the emerald itself, in its original state, before cutting, it must have been worth the ransom of an emperor; much had certainly been sacrificed to

fashion it in its present form.

To gaze into its depths was like questioning the inscrutable green heart of the sea. Fascinated, Amber felt his consciousness slip from him as a mantle might slip from his shoul-ders; awake, staring wide-eyed into the emerald eye, he forgot self, for-got the world, and dreamed, dreamed curiously, . . . The crash of the door closing be

hind him brought him to the right-about in a panic flutter. He glared stupidly for a time before comprehending that Rutton and Doggott had If there were enviling peculiar in

his manner, Rutton did not remark it Indeed he seemed unconscious, for a time, of the presence either of Ambe or of Doggott. The servant relieved him of his overcoat and hat, and he strode directly to the fire, bending over to chafe and warm his frost-nipped hands. Unquestionably he labored under the influence of an ex-traordinary agitation. His limbs twitched and jerked nervously; his evebrows were tensely elevated his eyes blazing, his nostrils dilated; his face was ashen gray.

From across the room Doggott sig-

naled silence to Amber, with a fore-finger to his lips; and with a discre-tion bred of long knowledge of his master's temper, siptoed through into the back room and shut the door.

Amber respected the admonition throughout a wait that seemed end-

The illustration demonstrates the fact that the stripe is still with us, and that it is still used in many fantastic ways. Now, the corner store has many stripes among the summer left-overs; serges, silks, veilings, and all are cheaper than they once were, and can be turned out with quite a new autumn smartness. How? Why, by using a heavy band of plain material at the bottom of the skirt as here, and employing all the solid piping pu elsewhere. These solid bits of black or color solidify materials in the palest stripes, give them character, as

one might say. A dead white serge with hairline in black, or any color, may be used in this way, and if the wearer is young and slim a scarlet line and trimmings would be excellent. Here the bodice and overdress of the frock are of black and white veiling, black silk forming the skirt band and pipings. Fashion's Edict is That Sleeves Shall Conform to General Style of Dress Worn.

When the sleeves are of the peasant type, large folded-back cuffs are usually employed as trimming, with per-haps a narrow undersleeve of some sheer white material, net or allover embroidery.

This can be edged with a bit of lace edging or a narrow bias piping.

When the regulation sleeve, that is cut on the lines of a coat sleeve, is used, the cuff is made more simple, to conform with this style. It is usually

straight and untrimmed, except for a double row of stitching.

Sleeves of a summer gown or blouse admit of much trimming. Lace insertion, embroidered or lace motifs, inets of both lace and embroidery, with edging on the cuffs, are all correct, if care is taken to choose suitable trimming and not too much of it is used. LAWYER CURED OF ECZEMA

"While attending school at Let Ohio, in 1882, I became afflicted with boils, which lasted for about two years, when the affliction assume form of an eczema on my face, the lower part of my face being inflamed most of the time. There would be water-blisters rise up and open, and wherever the water would touch it would burn, and cause another one to rise. After the blister would open, the place would scab over, and would burn and itch so as to be almost unbearable at times. In this way the sores would spread from one place to another, back and forth over the whole of my upper lip and chin, and at times the whole lower part of my face would be a solid sore. This condition continued for four or five y without getting any better, and in fact got worse all the time, so much so that my wife became alarmed lest it prove fatal.

SAVED US VAST TERRITORY.

and Miles From Oregon to Washing-ton Made by a Brave Man and the Results Which Followed In Its Wake.

The ride of Marcus Whitman was over snow capped mountains and along dark ravines, traveled only by sava men. It was a plunge through lcy rivers and across trackless prairies, a ride of 4,000 miles across a continent in the dead of winter to save a mighty territory to the Union.

Compared with this what was th feat of Paul Revere, who rode eighteen miles on a calm night in April to arouse a handful of sleeping patriots and thereby save the powder at Con-

Whitman's ride saved three stars to the American flag. It was made in 1842.

In 1792, during the first administra-tion of Washington, Captain Robert Gray, who had already carried the American flag around the globe, discovered the mouth of the Columbia river. He sailed several miles up the great stream and landed and took pos-session in the name of the United

In 1805, under Jefferson's administra tion, this vast territory was explored by Captains Lewis and Clark, whose reports were popular reading for our grandfathers, but the extent and value of this distant possession were very slightly understood, and no attempt at colonization was made save the estab lishment of the fur trading station of Astoria in 1811.

Astoria in 1011.

Strangely enough, England, too, claimed this same territory by virtue of rights ceded to it by Russia and of rights ceded to it by Ru also by the Vancouver surveys of 1792. The Hudson's Bay company establish ed a number of trading posts and filled the country with adventurous fur traders. So here was a vast territory, as large as New England and the state of Indiana combined, which seemed to be without any positive ownership, But for Marcus Whitman it would have been lost to the Union.

It was in 1836 that Dr. Whitman and man of the name of Spaulding, with their young wives, the first white women that ever crossed the Rocky mountains, entered the valley of the Columbia and founded a mission of the American board. They had been sent out to Christianize the Indians, but Whitman was also to build a state. He was at this time thirty-five years old. In his journeys to and fro the mission he soon saw the vast pos sibilities of the country, and he saw too, that the English were already ap prised of this and were rapidly pour-ing into the territory. Under the terms of the treaties of 1818 and 1828 it was the tacit belief that whichever nationality settled and organized the splendid territory would hold it. If England and the English fur traders had been successful in their plans, the three great states of Washington, Oregon and Idaho would now constitute a part of British Columbia. But it was

not destined to be. In the fall of 1842 it looked as if there would be a great inpouring of English into the territory, and Dr. Whitman took the alarm. There was no time to lose. The authorities at Washington must be warned. Ha bidding his wife adieu, Dr. Whitman started on his hazardous journey. The perils, hardships and delays he en untered on the way we can but faintly conceive. His feet were frozen he nearly starved, and once he cam very near to losing his life. He kept pushing right on, and at the end of five terrible months he reached Wash-

Bis statement was a revelation to the administration. Previous to Whitman's visit it was the general idea in congress that Oregon was a barren, worthless country, fit only for wild beasts and wild men. He opened the type of the government to the limitiess wealth and splendid researces of that western territory. He told them of its great rivers and fertile valleys, its mountains covered with forests and its mines filled with precious treasures. He showed them that it was a country worth keeping and that it must not fall into the hands of the English. He spoke as a man inspired, and his words were heeded. What followed the organization of companies of emigrants, the rapid softlement of the territory and the treaty made with Great Britain in 1848 by which the forty-ninth parallel was made the boundary the west of the Rocky mountains—are matters of history.

WINDSOR PICNIC

Windsor's 17th annual harvest picnic and home coming falls on Auic and home comi held on the last Thursday in August. Windsor has gained an enviable reputation for having the best, biggest and brightest picnic of any the Illinois corn belt, and nothing will be spared to make this year's gathering worthy of all that have preceded it. Good speakers will address the people, there will be an abundance of music, and in the way of free attractions the following have already been contracted for:

Dare Devil Cowan in bolloon ascension and parachute leap. Cowan is the man who made the high dive and who made the night balloon ascension lest year.

Flory, in his sensational fire slide: new and startling.

The Great Judson, the rubber man and contortionist. William Franklin, "the village cut

up," in comedy work. Emma Edmunds, a worthy companion of Franklin, and a genuine

laugh maker. Harry Smith, in songs and funny sayings; late with Dockstader's min-

strels. Ben Collier, the world's great juggler; a real novelty,

Charles Williams, the merry musical, Rube, and his violin; this is another old friend so good that his

return was sought. All of the above but Cowan and Flory, will give from two to four performances each. In addition to all these free acts some good clean play shows, merry-go-round, and other amusements are expected. But with all these attractions, more and better than some town give in half-adozen picnics, the greatest attraction is the meeting of old friends and of neighbors and friends of bygone days. So go to Windsor on Thursday. Aug. 31, for a day of rare enjoyment-

"THE OPTICAL SHOP."

Sullivan people now have a chance to have their eyes treated by an ex. pert Optician, in a way that they never have had before. Mr J. Frank Wallace, the Optician, who has been coming here for the past five years representing Augustive at Barbers', has gone in business for himself and will have his office at Barrum's Drug Store (Pogue's old stand), Mr. wallace takes with him a partner, Mr. Geo, E. Weatherby, who has had twenty year's experience in the optical business in Shullsberg, Wis. The firm will be known as "The Optical Shop," 109 E. North street, Decatur, Itl. Mr. Wallace and Mr. Weatherby are both so well known to people here in Sullivan, that they hardly need any introduction, except that they are, after September 1, to be in

the optical business for themselves. Mr. Wallace is known to some people as Augustine, but he says that he wants people to know that he is Wallace not Augustine. Lots of people do this as a joke on Mr. Wallace knowing the difference.

They say one thing sure that absolute satisfaction is guaranteed to all that do business with them, also a cordial invitation is extended to all to visit their place in Decatur, and anyone is welcome to watch their own glasses made. The grinding, drilling and mounting will be done in
