Kaunas City Stock Yards, Oct. 9, 1911. Out of the total receipts last week aggregating 83,000 head at this point, 45,000 head were bought and point, as, one head were nought and shipped back to the country. That was a few more than were taken by this drade the previous week, and about 100 car loads more than went out same last year. The demand was not quite sufficient to clean up the offerings, 8,000 head remaining in the ne at the end of the week, but aleamen were able to get steady sices on practically everything that cent out. A year ago prices on country hinds were going down, and raied 40 to 75 cents lower than at present. A few sear fat steers upoo, but the best long ders may be obtained at \$5.25 to 35.75, and the best light weight at \$4.65 to \$5.15. The run of rattle here today is 30,000 head, which includes 2,000 cattle to be exhibited at the Royal Show, in progress here this week. Bulk of the receipts here today is from distant ranges, and the choicest of it went into the car lot classes of the Show. On the open market some high grade panhandle two year olds sold at \$5 25 and choice yearlings brought \$5 to. Prices are steady to a little lower today, and it may be another good week to buy stockers and feeders, as receipts will no doubt run heavy all week, Acres of middle class cattle are on sale today, feeders from Nebraska and southwest Missouri, weighing 1,050 to 1,150 pounds at \$4.40 to \$4.75. Thirty cars of steers of this description went to the distill-eries at Terre Haute, Ind., last week at a cost around \$4.50. Serviceable stock steers are available as low as \$3.50. Stock cows and heifers are selling steady, a big string of well bred Texas cows late last week at \$3.60, and choice thin heiters today at \$4.40. Good to choice stock calves sell at \$4.50 to \$5.00. Native grass steers sell to killers at \$5.00 to \$7.00, quarantine steers \$3.90 to \$5.00. Old Mexico steers at \$3.80 to \$4.35, year calves \$6.50 to \$7.25.

Monmouth—The county authori-ties are searching for clues in the triple murder committed here in which William Dawson, his wife and their descriptor. which William Dawson, his wife and their daughter, Georgia, aged thirteen, were killed with an ax. Coroner Alva Klett of Little York impaneled a jury, which held a session, but postponed further investigation pending Jevelopments, which, it is hoped, will throw some light on the tragedy. A motive for the munders is lacking. Dawson was not known to have day enemies. Robbery could not have been the cause, as he was a poor man and articles of value were left untouched at the Dawson home. Bloodhounds owned by Roy Bendure, deputy sheriff of Macon county, were rushed to the city from Decatur, but the animals failed to help solve the mystery, as the scents were obliterated, owing to the large crowds which had entered the Dawson home.

PANORAMA IN A CIGAR BOX

Well, boys, who wants to make a anorama? Whoever does so, just set an empty cigar box and a few ther things, so stated below, and tart in. Cut a square hole in the iddle of the top of the box and with musclage and paper fasten a square piece of glass under it. From an old curtain roller cut two rollers the width of the cigar hox, and into one end of each drive a wire crank. Into the opposite end of each drive a brad for an axle. From another round wooden rod cut two other rollers of the same length, but of smaller diameter, and drive a small brad in the center of each end for an axle. These reliers project up through the top of the box with their brad axles resting in small notches cut in the top edge of the sides. Slots must be cut cross-wise in the top of the box, of course, to allow the rollers to project up through, as shown in the drawings. each end cut slots as shown, in which the axies of the lower rollers run, being allowed an upward and downward movement. Minneapolis Lad Picks Up Neat Sum Money by Establishing Profit-able Bakery Route.

Robert Stuart is a Minneapolis boy. Last summer he very much wanted to earn some money of his own. He thought of all the schemes that he ever had heard of and then he started ever had heard of and then he started an entirely new one. He went to Mr. Townsend, who had just opened a bakery in Hennepin avenue, and said that if he was supplied with a horse and wagon he thought he could get up a profitable route of customers. Mr. Townsend was a little doubtful of Robert's ability, but he said that he would get the said that he would get the said that the would be said that the would get the said that the said ert's ability, but he said that he would give Robert a commission on all the customers he could get. So Robert started out and made a thorough canvass of the neighborhood and he soon found nearly thirty families that agreed to take Mr. Townsend's goods if they were delivered promptly. So Robert got up every morning at five o'clock and, mounted on his wheel, he would take a big basket of bread and buns and deliver them to his customers. The basket was army fastened to the handlebars of his machine. He was so prompt and pleasant that his customers increased to fifty and them has confident to the contract of the contr customers increased to mry and he could not carry all of the bread in a basket. You may call it selfishness or what you like, but the fact remains that there can only be one mistress in one house. Things must go to her liking, or someone suffers. The only excuse for different families crowding into one ferent families crowding into the training crowding into one house is the expense of building separate houses—which means that if small houses were more plentiful there would be less difficulty.

This plan shows a house that costs very little more to build than a one-

As Schopenhauer thought, the solution of life is not for us in far off tales of the blessed; we are born for the world of manly business, task, vocation, function—athically known by

But the nineteenth century proved that human nature is more like an organism, not permanent in its structure, but capable of progress or retrogression, as the outcome of physical, mental and moral growth of the race for more than 10,000 years; and its moral dignity is that of untold ages of suffering, survival, failure, victory,

Hence the twentieth century preer or teacher of ethics should know our new physiology—the science of functions.

cur new physiology—the science of functions.

Our new psychology is called functional; our new logic is called functional; our new philosophy is really functional; our new philosophy is really functional; there is even a functional theology; their truth not sicklised o'er with 'the pale cast of thought, but vital with the pulse beat of life. Therefore, I venture, somewhat timidly, on June 6, before the Fellowship club in this city, to speak on "Functional Biblice," a term, I had not seen in print, and Professor Tufts of the University of Chicago gives assurince that no work has ever appeared, to his knowledge, under that title.

I do not seek, however, to corner functional ethics—quite the reverse—but would define the subject in part, as we follow the rough Bahnpfahl (new track) I am trying to blase in the woods, as follows: The ethics that associates itself with the functions of the body—growing out of those and of society—and the conceptions underlying.

The importance of this method (not system) is felt not only by conservative Christians who, as over against mere rationalistic creeds, have a presentiment that Christ's ethical way was functional instead of credal or methaphysical; but as a mode of thinking, functionalism was also the

was functional instead of credit of methaphysical; but as a mode of thinking, functionalism was also the only ultimate defence of Protestantism against the papacy. Not only conservative Christians, as contrasted with rationalistic, feel this influence of the zeitgeist, but Professor Fostor, e. g., a somewhat different type—fa miliar with up-to-date life sciences miliar with up-to-date life sciences—
affirms that one corner stone of twentieth century morality is in our human struggle for self-preservation, a
principle inexplicable in all activity
which we call life. The point we are
making is this: The ethics of the twentieth century will not be rationalistic but functional; and this fact is largely the fruit of our new or modern

The importance of this fact is obvious when we reflect that even the rennalssance largely ignored common life (which Henry Drummond defines as functions); and the so-called "culture" of that period denied to ordinary human nature the capacity to de-velop organs and functions, not only for its own preservation but develop-

Under the gradual influence of our new biology there is more and more a tendency to look for true goods in the normal development of the vital funcnental, moral and spiritual, as well

as physical and economic.

A basis of functional ethics in our new biology may be thus set forth:

When the organism modifies its activ-When the organism modifies its activity or its structure in response to changed conditions, those modifications are called functional adaptations. We would not press the analogy of colonies of ants and bees to human society too far. Right function is progressive action. True moral life is like the heart
pulsation; it ends one best only to begin another. The twentieth century
philosopher or preacher of ethics must
be something of a naturalist to realise
that the functions of the yearning,
struggling will are describable only in
terms of experience; and the human
mind, with its moral truth or svements, have grown through countless
ages.

The eighteenth century rationalism,
like the melleval dogmatism, and the
Greek idealism, looked upon the moral
world, not as dynamic or functional,
but static. The nineteenth century
thinkers since Darwin agreed on the
transformation of species—which had
been regarded since Aristotic, as fixed
and final in form once for all. Men of
the rationalistic eighteenth century
had much to say of the dighty of
changeless essential man from the
savage up to Shakespeare.

But the nineteenth century proved
that human nature is more like an

The Fairview School.

Miss Lucretia Walker, teaching in the Fairview school, speaks very highly of her school and patrons.

The community is made up largely of Pennsylvania Dutch. The parents do not talk English in their homes, but Dutch. The children at six years of age enter school knowing but little, if any English, so the teacher, being versed in the English language only, must, in her devel-opment of theit minds, be an interpreter in her instructions and teach them the English names of objects. They year antly grasp the words, They very aptly grasp the words, but when they undertake the job of teaching her Dutch there is some tongue-twisting, and she finds it difficult to get their accent.

Miss Walker in relating a the incidents says, a little girl came running into the schoolroom from the playground one day, and the following dialogue followed:

Pupil-"I want -......." Teacher-"Want what?"

Pupil - "Can't say, mother has Herschel Wright of Mowesqua was it?"

them."

Teacher—"What do you want with it?"

Pupil-"Uncoupled."

Finally light beamed upon the the teacher, and she asked, "Is it a pin you want?" The girl nodded consent, took a proffered pin and returned to the playground.

Another small girl named Polly, Wm Elder and daughters Opal and had hard work to get hold of the word, apple-butter, in order to express some work she had done.

The children all dress in one style, The girls all wear caps to school, some of them black silk, others white ones which are always spottlessly clean

Many of their customs differ from our own. They return thanks at the close of the meal instead of before.

Miss Walker likes the people very much. The patrons treat her with the play ground They are studious and are apt scholars, respecting her in every particular.

Deliberately enough the carter swerved his beasts aside to make way for the tonga, lest by undue haste he should make himself seem other than what he was—a free man and a Raiput. But when his fierce, hawk-dike eyes encountered those of the

The Virginian said nothing. But it was in his mind that he had indeed thrust his head into the lion's mouth by thus adventuring into the terri-tory which every instinct of caution and common-sense proclaimed taboo to him—the erstwhile kingdom of the Maharana Har Dyal Rutton.

CHAPTER XIL

The Long Day.
One travels dak by relays casually disposed along the route at the whim of the native contractor. Between Badshah Junction and Kuttarpur there were ten stages, of which the conclusion of the first was at hand—Amber having all but adandoned belief on its existence.

Stamming recklessly down the bed of an auxient water course, the tongs spun suddenly upon one wheel round a shoulder of the banks and dashed out upon a rolling plain, across which the trait snaked to other farther hills that lay dim and low, a way line of the trait snaked to other farther hills that lay dim and low, a way line of the contractor of the hills in whose heart Entraper itself lay or

marking the end of the first stage, the beginning of the second.

Ram Nath refined in with a flourish and lifted a raucous voice, halling the syce, while Amber, painfully disengaging his cramped limbs, climbed down and stumbled toward the veranda. The abrupt transition from violent and erratic motion to a solid and substantial footing affected him unpleasantly, and with an undeniable qualm; the earth seemed to rock and flow beneath him as if under the influence of an antic carthquaks. He was for some seconds occupied with the problem of regaining his poles, and it was not until he heard an ling-lishwoman's voice uplifted in accents of anger, that he remembered the other wayfarer with whom he was to share his tongs, or associated with the white-clad figure in the dark doorway of the bungalow with anything but the thausants.

with the burden of its many years, and she was a quito substantial young person. Indeed, so loudly did it croak a protest and a warning that she immediately arose in alarm.

"Mr. Amber!" she said; and,
"Well . . !"
"You'll forgive me the surprise?"

"You'll forgive me the surprise?" he begged, going up on the veranda to her. "I myself had no hope of finding you here."

"But," she protested, with a pretty flush of color—"but I left you in the States such a little while ago!"

"Yes?" he said gravely. "It seems so long to me. . . And when you had gone, Long Island was a very lonely place indeed," he added, with calculated impudence.

Her color deepened and she sought another chair, seating herself with

If she overlooked the adoration of his eyes, she was rather less than woman; for ft was in them, plain to be seen for the looking. The khansamah followed her from the bungalow, staggering under the weight of her box and kithing, and with Ram Nath's surly assistance made them fast to the front seat, while Amber gave the girl his hand to help her to her place, and lifted himself to her side in a mute glow of ecstasy. Fate, he thought with reason, was most kind to him.

Her color deepened and she sought another chair, seating herself with gingerly decision. "Time sure your don't mean me to assume that you've followed me half round the world" "Why not?" He brought another chair to face her. "Besides, I haven't seen anything of ... India for a good many years."

"Mr. Amber!"

"Ma'am?" he countered with affected humility.

"You're spoiling it all. I was so glad to see you—I'd have been glad to see you—I'd have been glad to see any white man, of course—""Much obliged, I'm sure."

"And now you're actually filtring with me—or pretending to."

"Tim not," he declared soberly, "As a matter of solemn fact, I had to come to India."

"You had to?"

"On a matter of serious business. Please don't ask me what, just yet; but it's very serious, to my way of thinking. This happy incident—I count myself a very happy man to have been so fortunate—only makes my errand the more pleasant."

"You were to join your father in Darjeeling, I believe?" he countered, cautions.

"But I found he'd been transferred unexpectedly to Kuttarpur. So, of course, I had to follow. I telegraphed him day before yesterday when I was to arrive at Badahah Junction, and naturally expected he'd come in person or have some one meet me, but I presume the message must have gone astray. At all events there was no one there for me and I had to come on alone. It's hardly been a pleasant experience; that incompetent tongs-wallah behaved precisely as though he had deliberately made up his mind to delay me.

And the tongs's nearly ready; I must lock my hit-bag."

She went into the bungslow, leaving him thoughtful, for perhaps.

But the back of Ram Nath, as that worthy busied himself superintending the harnesising in of fresh ponies, conveyed to him no support of his half-credited bypothesis that this "accident" had been carefully planned by Labertouche for Amber's especial benefit.

races to the creek of the western hill, into which it burrows, from which it springs; a vast enigms propounded in white marble without a note of color save where the foliage of a hidden garden peeps over the edge of a jealous stream—a hundred imposing mansions merged into one monatrous and imperial mass.

But for a moment were they permitted to gaze in wonderment; Hain Nath had little patience. When he chose to, he applied his whip, and the ponies stretched out, the tongs plunging on their heels down the steep hill-side, like an ungoverned, ungovernable thing, maddened. Within a quarter of an hour they were careering

to pass either in or out without the express sanction of the State. The commander of the guard instituted an impudent catechism, in response to which Ram Nath discovered the several identities and category of his charges. The commander received the information with impartial equanimity and retired within the sity to confer with his superiors. After some time a trooper was sent to advise the travelers that the tonga would be permitted to enter with the understanding that the unaccredited Englishman (meaning Amber) would consent to lodge for the night in no other spot than the State resthouse beyond the northern limits of the city.

Abruptly the peace of the night was shattered, and the hum of the encampment behind them with the roar of the city before them was dwarfed, by a dull and thunderous detonation of cannon from a terrace of the palaice. The tonga ponies reared and plunged, Ram Nath mastering them with much difficulty. Sophia was startled, and Amber himself stirred uneasily on his perch.

"What now?" he grumbled. "Tou'd think we were visitors of state and had to be durbarred!"

Another crash ellenced her. Amber continued to count. "Twenty-one," he said when it seemed that there was to be no more cannonading. "Isn't that a royal salute?"

"Yes," said the girl; "four more guns than the Maharana of Khanda-war himself is entitled to."

"How do you explain it?"

"I don't," she replied simply. "Can

So you think my insight into native character a sort of birthright—a sense inherited?"

"Perhaps—something of the sort."

"You may be right. We'll never know. At all events, I seem to have a more—more painful comprehension of the native than most of the English in this country have; I seem to feel, to sense their motives, their deaires, aspirations, even sometimes their untranslatable thoughts. I believe I understand perfectly their feeling toward us, the governing race."

"Then," said Amber, "you know something his Highness the Viceroy himself would give his ears to be sure of."

"It most that: but I do." A great hush had fallen, replacing the rolling thunder of the state ord-nance. Even, the voice of the city seemed moderate, subdued. In st-lence the massive gates studded with sharp-toothed elephant-spikes swung open.

A FINE NIGHT-CAP Bed and Sleep On.

The Best Thing in the World to Go to Bed and Sleep On.

"My wife and I find that 4 teaspoonfuls of Grape-Nuts and a cup of hot milk, or some cream, with it, makes the finest night-cap in the world," says an Alleghany, Pa., man.

"We go to sleep as soon as we strike the bed, and slumber like babies till rising time in the morning.

"It is about 5 years now since we began to use Grape-Nuts food, and we always have it for breakfast and before retiring and sometimes for lunch. I was so sick from what the doctors called acute indigestion and brain fag before I began to use Grape-Nuts that I could neither eat, sleep nor work with any comfort.

"I was afflicted at the same time with the most intense pains, accompanied by a racking headache and backache, every time I tried to eat anything. Notwithstanding an unusual pressure from my professional duties, I was compelled for a time to give up my work altogether.

"Then I put myself on a diet of Grape-Nuts and cream alone, with an occasional cup of Postum as a runner-up, and sometimes a little dry toast. I assure you that in less than a week I felt like a new man; I had gained six pounds in weight, could sleep well and think well.

"The good work went on, and I was soon ready to return to business, and have been hard at it, and enjoying it ever since.

"Command me at any time any one enquires as to the merits of Grape-Nuts. Tou will find me always ready to testify." Name given by Postum Co. Battle Creek, Mich.

RASH ALL OVER BABY'S BODY Itched So He Could Not Sleep

"On July 27, 1909, we left Boston for a trip to England and Ireland, taking buby with us. After being in Ireland a few days a nasty rash came out all over his body. We took him to a doctor who gave us medicine for him. The trouble started in the form of a rash and was all over baby's body, head and face, at different times. It irritated, and he would scratch it with all his might. The consequence was it developed into sores, and we were atraid it would leave nasty scars on his face.
