Modern Coaling Facilities

The coaling of locomotives at large terminals where a great many engines are dispatched requires the handling of a large amount of coal. The modern engine carries 15 tons, 30,000 pounds.

In the early days coal was shoveled direct from cars, carried onto engines by hand in small 2 bushel boxes, or taken direct from mines adjoining the main line; but since the nearby coal deposits have been worked out and the mines have been located on spur tracks away from the main lines, coal chutes designed to deliver coal in 1 to 10 ton lots on the engine tender have been erected at convenient places, usually about 30 miles apart.

Freight trains require coal about every 50 miles, while passenger trains usually run 100 miles or more, without taking coal.

In renewing the old coaling plants or adapting them to double track, the Wabash railroad is erecting modern steel structures having 300 tons storage, and so arranged as to deliver coal on either the main tracks or passing tracks, or all at the same time.

The coal is dumped from self clearing cars into a concrete pit, where it runs by gravity into an elevator having ton buckets which are hoisted by electricity.

The whole arrangement makes a resourceful and economical coaling plant, as an engine can take 10 tons of coal in as many seconds, thus insuring minimum stoppages and avoiding delay to trains.

WITHOUT A FRANCHISE

Lovington Decided They as Well Keep Profit at Home

At a recent meeting of the village board of Lovington, an ordinance was passed, repealing the ordinance proposing to sell the electric light plant to the Central Illinois Public Service company of Chicago.

At the regular monthly meeting Monday evening, an ordinance providing for the issue of \$5,500 in bonds passed by a unanimous vote. The ordinance provides that the matter shall be submitted to a vote of the people on October 4. If the proposition carries in the election, the money from the issue will be used to put in new machinery, and to otherwise improve the municipal electric light plant and water system and to extend the water mains in the city.

L. G. Hostetler, chairman of the fire and water committee, states: "Lovington is especially fortunate from the fact that not a single franchise of any kind exists in the city. After giving the matter consideration we decided that it would be unwise to relinquish our rights by tying the town up in a franchise for a long period of years. If the Public Service company can make money, they will do it by employing competent men and improving the service. I believe the plant can be made a profitable investment for the city. For this reason, we have decided upon the route we have taken."

Automobile Accident.

Last Sunday morning A. E. Foster took John A. Reed, his wife, and son Orval, for a ride in his automobile. They went to the Hunt farm, about three miles southeast of Sullivan, on which John Ramsey lives, and he went with them to go across the

top of the brink of a hill, near 100 feet high, is a fence and to reach their destination it was necessary to go through a gate in this fence. The roadway through this gate is an inclined plane, succeeded by a narrow, level strip. The car being heavy, carried it beyond the level and to the decline, where it got beyond Mr. Foster's control. He tried to turn and stop the car, saw the predicament and said to Mr. Reed, "Now what do you think of that?" Mr. Reed leaped from the car, intending to open the back door, and when he turned around the car was tearing down the hill and Mr. Foster was standing near him.

The car, at a distance of about thirty feet, struck a sapling, passed over it, and continued going. About fifty feet from the sapling it was stopped by a tree. This threw Mrs. Reed out to the front and right of the car, presumably between the top and wind shield, or as the wind shield was broken off, it may have offered no obstruction. Mrs. Reed possesses great presence of mind and remembers every detail. She states she was sitting on the seat, ready to grasp her child, and only lost consciousness after she struck the ground. She fell with her right foot underneath her and both bones of the leg were broken about four inches above the ankle, one of the bones making a hole through the shoe and stocking. She was also bruised about the shoulders, back of the head and neck.

The statement about Mrs. Reed getting out on the running board is false, as she never attempted to get out of the car, and Mr. Reed states both doors were closed when he went to the child.

The child, a stout, lusty fellow four years of age, grabbed the rod on the back of the front seat, held close to the seat, and came off without a scratch or bruise.

One of the bows of the top of the automobile and the cowl were broken, one lamp damaged, the radiator bent slightly, as well as some other parts damaged. The work and repairs on the machine will cost about \$150.

If the accident had to happen, everyone connected with it is very fortunate that it was no worse. It may be that the steady incline of the hill, and the sapling, had much to do with lessening the speed of the car before its final stop.

OUR MILITIA PARTICIPATES

Co. C. Ranks High and Goes to Edwardsville

Capt. Scarborough went to Springfield Tuesday in response to a call from the adjutant general.

He was very much surprised on learning the purpose of the call. Company C., of the National Guard, is one of the four best companies in the state; they go to the Centennial in Edwardsville the 16th and 17th of September. They represent the militia of the state, and take a part in unveiling the monuments of the five or six governors that were born in Madison county. There will also be aviation meets and water fests to witness.

100,000 people are expected to be present at this gathering. The company is furnished transportation and draws its regular pay while gone. They will leave here Sunday, September 15, on the C. & E. I., but after running a short distance they will be transferred to a special train.

Under the surveillance of their captain, Dr. W. E. Scarborough, the company has raised to the front ranks. Capt. Scarborough has the respect of his company. He has at all times treated them well, yet strictly enforced the rules.

OBITUARIES.

MRS. REBECCA CARTER.
Mrs. Rebecca Carter was born March 2, 1839, and died at her home in Sullivan, August 31, 1912, at the age of 73 years, 5 months and 29 days. Her ailment was cancer.

She had three sons, Carl, Edward and Walter, and one daughter, Celia, who lived at home with her mother. The funeral services were conducted at the residence, Sunday, at 3:30 p. m., and the remains interred in Greenhill cemetery.

MRS. ABRAHAM RONEY.
Mrs. Sarah Roney, the wife of A. Roney, died at her home in Sullivan Friday of last week, after a protracted illness caused by a tumor.

She was born March 25, 1837, near Floydsberg, Kentucky. She died at the home of her son, Hugh Roney, at the age of 75 years, 3 months and 5 days. The funeral was conducted at the residence, Saturday, at 3 p. m., by Rev. A. L. Caseley and the remains were taken to Greenhill cemetery for burial.

An Interesting Trip.

W. I. Sickafus and family, A. T. Jenkins and Mrs. Alec Witherup left Sullivan for Stewardson, Tuesday, at 12:37, arriving there at 1:28. On the return trip, two miles out of Stewardson, it began to rain very hard and they went one mile in rain when the wheels were stopped by the mud. Mr. Sickafus stopped and put on the chains and when they reached Strasburg the roads were dry and the machine glided along lively for home. Near Kirk station they struck the mud again and mudded it for about three miles. At the township line, northwest of Bruce, the machine skidded and went into a ditch. Hagerman's force of carpenters coming along, all hands went to work and after some hard labor got the car on the wagon road again. Then they steered into Sullivan without any more trouble, arriving here about 7 p. m., bringing with them all the soil that would stick.

Cloudburst.

There was a cloud-burst near Cadwell Tuesday afternoon. In forty minutes time in the vicinity of Lucas Seass's the streams were swollen. Water in the road near his place was four to five inches deep on the level. A wire fence seventy-five rods long on Mr. Seass's farm, was carried off, stanchions and all. There was also some hail during the storm. The creek near the Jonathan Creek church was too high to cross soon after the rain.

"My child was burned terribly about the face, neck, and chest. I applied Dr. Thomas' Eclectic Oil. The pain ceased and the child sank into a restful sleep." Mrs. Nancy M. Hanson, Hamburg, N. Y.

Illinois State Fair

Domestic Science for boys and girls and a boys' state fair school is one of the features of this year. The Illinois State Fair was the pioneer in promoting special instruction for girls and young women in a domestic science school during the state fair. Also in providing practical lessons for farm boys on the fair grounds.

In the domestic science school the ladies must be over 18 years old, and one is admitted from each county—102. At a cost of \$8.00 for board during the two weeks' session, a girl can get a good idea of cooking, sanitary housekeeping and personal hygiene. Able instructors are employed for this purpose. Each pupil must bring her own toilet articles, napkin ring, a white apron and kitchen apron, and a blanket and spread for her single bed. The pupils have sleeping quarters in the Women's building in the fair grounds, with ample police protection. Miss Laura A. Gouterman, secretary, Edwardsville, will give full information.

The boys' state fair school is in charge of Dr. John Dill Robertson, for the Board of Agriculture, Superintendent of Public Instruction F. G. Blair, and Col. Chas. F. Mills, of Springfield, who is the secretary. The third annual session will open on the state fair grounds, Springfield, on October 5, and last until October 12. In 1910, 125 boys enrolled, and 1911, 194 registered. It is of tremendous educational value to the boys of Illinois who live on farms, or contemplate entering that profession. Tents and bedding are furnished by Adj. Gen. Dickson of the state militia, and there are four mess tents and one large tent for lectures and meetings. Gov. Deneen has taken a personal interest in the boys' school from its inception.

Two boys are admitted from each of 101 counties and eighteen from Cook county. They must be from 15 to 21 years old. Each boy must pay his railroad fare and pay \$5.00 for board and incidentals, and provide sheets, towels, and soap. Further information given on application to Secretary Mills.

"IN A BAD WAY"

Many A Sullivan Reader Will Feel Grateful
for This Information

When your back gives out,
Becomes lame, weak, or aching;
When urinary troubles set in,
Your kidneys are "in a bad way."
Don't delay—use Doan's Kidney Pills.
Here is good evidence of their worth.
Mr. Alfred Jacob, N. Pine St., Arcola,
Ill., says: Kidney complaint kept me in
misery for a number of years and as time
increased, I gradually grew worse. Last
summer I became so bad that I had to give
up entirely. I could scarcely drag myself
about. The pain seated itself in the small
of my back and often radiated throughout
my body. My feet and ankles were swollen
and my whole body sore. I felt restless
and nervous and at times could hardly
draw a long breath. When in that condi-
tion, I began using Doan's Kidney Pills
and although they did not help me much at
first, I had confidence in them and continued
their use. By the time I had taken the
contents of six boxes, I was free from pain.
I strongly advise anyone suffering from
kidney trouble to give Doan's Kidney Pills
a trial.

The Lincoln Way

"The Lincoln Way", the route
taken by the Lincoln Family when they
moved from Indiana to Illinois in
1830, has been found. By an act
of the last legislature of Illinois,
Charles M. Thompson, of the state
university at Champaign was author-
ized to find the way and temporarily
mark it. He has just completed the
work.

So far as Mr. Thompson is able to
determine, the Lincolns crossed the
Wabash river at Vincennes, which
was the scene of the famous capture
of old Fort Sackville, and the British
troops under General Hamilton dur-
ing the Revolutionary war by Gen-
eral Clark, and traveled on the Vin-
cennes-St. Louis stage road as far as
Lawrenceville, turning northward
there and passing through Palestine,
York, and Darwin, to Paris. From
Paris it appears they followed the
stage road westward through Charles-
ton, Mattoon, and Shelbyville, to De-
catur.

The State Historical Society of Illi-
nois now has the matter in hand. It
is the hope of the society to have the
"Lincoln Way" marked with "mark-
ers" soon.

The Fashions and the Home

Walking Suit of Brown Eponge

Eponge or sponge cloth is a material that will hold over good in the fall styles. It is a serviceable fabric that has a smart air and is admirable for all round wear, as it sheds dust perfectly.

The stunning little suit pictured is of russet brown eponge cloth. The coat has the new front double breasted closing that will be so much in evidence this autumn. Metal buttons in ball shape trim the jacket in a fetching fashion.

HOW TO TEST PURCHASES.

To Insure Getting Your Money's Worth in Buying Various Materials.

The pure food law greatly aids in protecting us from adulteration in foods, but there is no law that protects us from adulterated clothing. We buy "pure linen," "pure silk" materials, "all wool and a yard wide," and get home to discover most of it is cotton.

To Test Linens.—Apply the oil of vitriol test as above. If the sample is genuine linen it will be unaffected by the treatment, but if it is for the greater part cotton the sample will be almost entirely destroyed.

To Test Woollens.—Fringe both warp and web threads about an inch and immerse the sample in oil of vitriol for nearly two minutes. Then take out and wash well. This will destroy the cotton, but the wool will hardly be affected.

POTATOES IN DAINTY FORM.
Potatoes a la Duchesse.—Form well seasoned cold mashed potatoes into biscuit shaped cakes, dip them into melted butter and glaze them with beaten egg.

Good Ladies' Potatoes.—After mashing the potatoes put them in a baking dish well buttered and mold them in the shape of a dome. Rub the surface liberally with melted butter.

SELECTING BEEF.
Good beef should be a uniform deep red in color. If too bright it may have been treated with preservatives.

FISH DELICACIES.

Clam Pie.—Take medium sized clams, uniform in size, lay on a board and cut in pieces, not too small. Chop fine a quarter pound of salt pork, streaked lean and fat.

To Smoke Eels.—Clean medium sized eels, leaving the skin on. Wash, dry and rub each one lightly with salt. Set in a cool place for twenty-four hours, turning twice during that time.

PLEASES DANCING TOY.

A funny little dancer, and a very pleasing toy for baby sister can be easily made of cork. Carve with a pocketknife a funny head at the top end of the cork and color it to suit baby's taste.

A Faithful Friend.
When I wake he comes to greet me. With a wagging tail—he meets me when I'm coming home at twilight from the business of the day.

What capital of the southern states should be wealthy? Richmond.
What capital is a gentleman of Queen Bess' time? Raleigh.
What capital is composed of a natural water supply and a meadow? Springfield.

A Capitulation to Cupid as The Result of a Bold Wooing

By JAMES E. KENSINGTON

IN the city of New York the throng of carriages on Fifth avenue is so great that mounted policemen are stationed at intervals to keep them in line and extricate them when blocked.

There was little hesitancy in accepting such a tempting offer. He had often seen the gentleman at his mistress's house. Doubtless he meditated some harmless prank. Turning over the reins, James descended from the box and was lost in the crowd.

Now, there had been for some time a desperate love game between Mr. Townsend and Miss Annette Van Deever, the occupant of the carriage. The lady would encourage her lover for a brief season, when she would suddenly treat him with the most studied indifference.

The lady wondered why she was so long in reaching her home. When the carriage stopped it was under a porte cochere. The man on the box gave a call, which was answered by a maid, who came out of the house and received whispered instructions from the coachman.

HARD TREES TO CLIMB.
Scientific Way to Do It When There Are No Low Branches.

The ordinary method of climbing a tree is by grasping hold of the lower branches with firm hands, placing the legs about the tree's trunk and pulling up with the former and pushing up with the latter.

What capital is composed of a natural water supply and a meadow? Springfield.

Religious Work

A glimpse of the poverty in which many country clergymen live and work in England is shown by twenty appeals which were evoked by an advertisement by a Coventry doctor who offered a bicycle to a poor clergyman in a country parish.

There is a Welsh rector among the applicants whose stipend has averaged less than \$720 a year during the last five years and who has nine children. His parish is fifteen miles from a town, and it is over eight miles in length.

Mission Colleges.
In a statement regarding its higher educational work abroad the American board of commissioners for foreign missions says that nineteen colleges and fourteen theological schools are being maintained and that in a little more than a year \$1,112,000 has been received toward the endowment.

The Chapel Car St. Peter.
The all steel chapel car St. Peter, the second church on wheels ever built for the Catholic church, which was placed on exhibition in Chicago and then taken west and southwest through territory where there are no churches, is equipped with everything necessary for the celebration of mass and other religious devotions.

Laymen's Missionary Movement.
During the coming year regular laymen's missionary conventions will be held in at least fifty cities. This is only a fraction of the systematic missionary work that should be carried on in the next year.

The Eucharistic Congress.
The indications are that 170,000 persons will take part in the procession of the host at the eucharistic congress in Vienna. Of the number mentioned 2,000 will be Americans.

Pointed Paragraphs.
Most of a man's illusions depart with his hair.
The morals of some people seem to run on flat wheels.

Joy.
O pure of heart, thou needest not ask of me
What this strong music in the soul may be!
What and wherein does it exist,
This light, this glory, this fair, luminous mist,
This beautiful and beauty making power?
Joy, virtuous lady—joy that ne'er was given
Save to the pure, and in their purest hour.

Seeing Good in Everything.
One dear old woman was rallied by her friends because of her habit always of seeing some good in every one.

When a woman asks a disinterested man for his candid opinion of her the chances are she would consider him a brute if he told her the truth.—Chicago News.

When a girl marries she exchanged an admirer for a regular boarder.
A pessimist can get more genuine pleasure out of a calamity than out of a blessing.

Too many men make the mistake of overestimating their capacity when they are looking for trouble.
A knocker is a man who goes about with a hammer looking for some other fellow to pose as an anvil.

If a man is a millionaire it is an easy matter to bring up his son so that he won't be able to support himself later.

Mary McDowell Osborne was granted a divorce from her husband Clint Osborne in the Mattoon city court Monday afternoon on the ground of cruelty. She was allowed to resume her maiden name, McDowell. She is a daughter of James McDowell of Shanghai, west of here a couple of miles. This is the woman, or rather child, he took up with when by repeated cruelties he drove his first wife, Dora Layton Osborne insane and into the asylum. It will be remembered by many readers of this paper, how his first wife ended her troubles a few months ago by hanging herself. This last woman was but a child and a weak one at that when he gained possession of her.

Running up and down stairs, sweeping and bending over making beds will not make a woman healthy or beautiful. She must get out doors, walk a mile or two every day, and take Chamberlain's Tablets to improve her digestion and regulate her bowels. For sale by Sam B. Hall and all dealers.
