POPULAR COUNCIL BURNHDAY

The Sullivan Council is considered one of the best and mose popular in the state. The Super-excellent degree was conferred on a number of The C candidates, Thursday, from neighboring towns. Fourteen came from Hillsboro, several from Danville and Villa Grove, besides a number of condidates living in Sullivan and vicinity. At noon a large crowd was assembled in the hall. They were given dinner at Miss Sadie Scott's boarding house.

A six o'clock banquet with plates

CHAPTER XXXI.—Continued.

Prince Louis saw the dawning of consternation. Rapidly he considered. Was it well to take away a man's happiness and courage just before a fight? He remembered some words of Francis spoken three years before, words whose dramatic barreless had struck tim. "When a knight of the old time went into battle," the young man had said, "he wore on his helmet the badge of his lady, and the thought of her in his heart. A man fights better so." Very well. This blind knight should have his letter, with the meaning he ave his letter, with the meaning he ad read into it, for his lady's badge, ad he should fight tomorrow with the ought of her in his heart. The letr suggested another meaning to so-histicated Louis Bonaparte, but there no need to hasten the feet of un-appiness. The resonant French voice ooke at last in an unused accent of ordiality and the Prince lied, with

mgrudging graciousness.
"Mistaken, my Francois! Not at all.
he little billet-doux breathes love for
ou in each line—there is no question!
ut, mon ami, you have not finished your story." So Francois explained about the letter left with Lucy Hampton and its premature sending. "That has reached her now—she knows now that I love her, she knows what has en my lifelong wishshe has hurried this," and his hand crushed note tenderly—"she has hurried this to me before the fight—that I might know her love also—that I might fight better for you, my Prince —Louis—with that joy in my heart." Prince Louis, his head thrown back his expressionless eyes watching the gings of smoke which he puffed from his mouth—ring after ring, mounting in dream-like procession to the low celling, considered again. Somewhere in the chain of events of this love affair his keen practical sense felt link that did not fit—a link forced into connection. Vaguely he discerned how At was something had happened to the Virginian letter-there had been a confusion somewhere. To him the Your words of Alixe's postscript were "Pietro sends his love." A subconscious reasoning made him certain that Pietro would not have come into such a letter if it had been indeed a love-letter; that the three lines of writing just before the battle could not have held another man's name, if they had been written to the man whom she loved. Very dimly, very surely the Prince concluded these things; and then he lowered his cigar, and his gray dull eyes came down from the ceiling and rested, kindly on the radiant face. "You are right, my friend. It was an exquisite thought of your lady-love to put this other weapon, this bright sword of happiness into your hand, to fight with tomorrow. Mon Dieu, we will reward her by send-ing her back a Marshal's baton by you; a Marshal's baton tomorrow, François! How would it sound, par example, to say Madame la Mare-

The light from Francois' eyes was like a lamp. "My Prince—Sire—there are three things I have desired all my life, all great things, but of them that one— the baton of a Marshal—is the least.

place and show vive you on the throne of France; might fulfill the Emperor's prop and be not a Marshal some day longer but a Marshal of your emp longer but a Marshal of your empire—
it is asking much of one lifetime, above all for a man born a peasant, is it not? Yet of those three winhes one wonderful fulfillment has come to me"—he gripped his letter closer—"and one, I believe tomorrow brings. Before tomorrow night"—his great eyes were lifted toward the ceiling of the room, and in them was the rapt look of the child of the farm-house in the Jura, a look of a seer of visions, a look that caught at the Prince's nerves, and made him draw a breath quickly. "Something above myself tells me," Prancois said slowly, and the words came with a languid power, as if his personality were a medium, "that before tomorrow night the officers who stand about you shall hall you Emperor over the body of a man who lies before you."

before you."

In the silence, the Prince's watch could be heard ticking. Francois shivered violently.

"Ugh!" he said, his teeth chattering.

"It gives me a 'crise de nerfa,' that trick of vision-seeing. I do not like it, and yet at times it seizes me. Why should it come to a man happy as I am—a man who has dared ask three enormous wishes of the good fairles; who holds one of them in his hand" who holds one of the good tarries; who holds one of them in his hand"—he lifted the letter—"who sees another in easy reach, and who," he smiled brilliantly, "who will be well content without the third, my Prince, the first two being his." He shivered again. "Is the night raw? It is as if I were in a grave, this coldness," he said, looking about with a disturbed gase, "yet my life is just beginning."

The Prince rose and tossed his cigar to the fireplace. "It is simply that you are tired, Francois," he said in the tranguil tones which no peril disturbed. "The nerves of us all are stretched and yours are the finest strung. Go to bed, and at daylight you will be warm enough, with the work that awaits us. Sleep well—good night, my friend."

Later, in the darkness of his cham-

Later, in the darkness of his ber, Prince Louis lay awake, his imag-ination filled with the man whose draination filled with the man whose dra-matic personality appealed to him as few had ever done. He thought of his own life, according to his lights not a bad life, radically strong and radically gentle, yet complicated, abnormal from its start, with many shadows and many stains; then of the crystal clear-ness of this other's, with his three wishes in which he trusted as simply as a child would trust to the fairies. A smile almost tender stole across the smile almost tender stole across the mask-like features in the dark. "There is no doubt but the girl will marry the marquis," he reflected. "Yet I am glad I left him his hope and his happiness." A vision of François' beatified look rose before him.

"A man fights better so," the Prince murmured aloud, and, his own sadness forgotten in another man's joy, he fell

The Bugle-Call.

The gray dawn of a Sunday morning began to break over the sleeping city of Boulogne, yet earlier than the dawn anxious eyes opened to watch, and men's hearts beat fast to meet it. s and bar racks Louis Napoleon's followers were waiting before daylight for the part they had to play. No man among them was as quiet, as little nervous as the Prince, yet his as well as every gal-

lant heart of them felt a throb of relief with its bound of excitement when a trumpet from the Austerlitz barracks, the barracks of the fourth artillery, Napoleon's own regiment, suddenly sounded.

It was the signal, and in a moment the Prince and his escort were mov-ing down the dark street toward Colonel Vaudrey's quarters, toward that ringing note not yet died out from the pulsing air.

The city was tranquil when Prince Louis reached the barrack-gate, and the coldier-blood in him rushed in a great things, but of them that one—
the laton of a Marshal—is the least.

If I might win her love—I have east;

If I might win her love—I have east;

If I might help put you in Napoleon's like, silent, the regiment formed in

In the glowing light the soldiers who routed toward him could see that the oldriess face turned grayer, but that was all, and quickly Colonel Vaudrey

"Soldiers of the fourth artilles said loudly, "a revolution beg day under the nephew of the B egins today under the nephew of the Emperor Napoleon. He is before you, and comes to lead you. He has returned to his land to give back the people their rights, the army its greatness. He trusts in your courage, your devotion to accomplish this glorious mission. My soldiers, your colonel has answered for you. Shout then with me 'Long live Napoleon!' Long live the Emperor.'

the Emperor."

The terse soldierly words were hardly finished when the regiment, strongly Bonapartist always, carried off its feet now by the sight of the Prince, by the honor of being the first to whom he came caught up the cry, and the deep voices sent it rolling down the empty streets. Louis Bonaparte standing erect, motionless, impassive as always, wondered if a pulse parte standing erect, motiouless, impassive as always, wondered if a pulse might beat harder than his and not break. He held up his hand, and rapidly, yet with lingering shouts of enthusiasm, the tumult quieted.

"Soldiers," he said, "I have come to you first because between you and me there are great memories. With you the Emperor, my uncle, served as captain; with you he won glory at the siege of Toulon; you opened the gates

siege of Toulon; you opened the gates of Grenobie to him when he came back from Elba. Soldiers, the honor back from Elba. "It is the sign of French glory; it has shone over every battlefield; it has passed through every capitol of Europe. Soldiers, rally to the eagle! I trust it to you—we will march today against the oppressors, crying 'Long live France.'" live France."

One who has not heard a regiment One who has not heard a regiment gone mad can not know how it was. With deafening clatter and roar every sword was drawn and the shakos flew aloft and again and again and again the men's deep voices sent up in bro-ken magnificent chorus the great his-toric cry to which armies had gone into hattle. into battle

"Vive l'Empereur! Vive Napoleon! The souls of a thousand men were on fire with memories and traditions, with a passion of consecration to a cause, and as if the spell of the name

cause, and as if the spell of the name grew stronger with its repetition they shouted over and over, in tremendous unison, over and over and over."

It was necessary at last for the quiet slender young man who was the storm-center to raise his hand again, and with a word, with the glimmer of a smile to speak his gratitude—to stop the storm. There was much to be the storm. There was much to be done. The fourth artillery was but done. The fourth artillery was but one of several regiments to be gained if the victory were to be complete. Colonel Lombard was dispatched to a printing office with proclamations to be struck off; Lieutenant Laity hurried away to his battalion; a detachment was sent to hold the telegraph office; the tumult once quieted, the yard was a scene of efficient business, for all this had been planned and each officer knew his work. In a very few moments the officers of the third armoments the officers of the third ar-tillery who were with the Prince had hastened to their quarters, another had been sent to arouse the forty-sixth of the line, at the Place d' Alton bar-racks, and shortly Prince Louis him-self was on his way to the same place. Through the streets of the city, no longer empty, he passed with his offi-cers, and the people poured from their houses, and joined and answered the shouts of the soldiers.

"Vive l'Empereur!" the soldier cried. "It is the nephew of Napoleon," and the citizens threw back, "Vive l'Empereur! It is the son of the honest king of Holland! It is the grand son of Josephine!"

They pressed so close about th small figure in its Swiss uniform of a colonel that for a moment he was sen arated from his officers, and Colonel Vaudrey, smiling for all his military discipline, was forced to order his mounted artillerymen to clear the road. Every moment an old soldier broke out of the mass and embraced the eagle which Lieutenant de Quer elles carried proudly high above all this emotion; the soldiers' eyes flashed with success; the Prince's heart beat high for joy to know that he had not misread the heart of army or peo ple. When the column passed the go darmerie the guard turned out and presented arms, shouting, "Long live the Emperor!" So he went through the streets of Boulogne, Louis Napoleon Bonaparte, eight long years before he came to his own, and marched in riggment and heclaration to ed in triumph and acclamation to a

And close by his side, his look radiant as the Prince's look was con tained and impassive; marched always Francois Beaupre. The hard-earned military knowledge, the patient toll of preparation had come into play, and in a hundred ways the man had been useful. With no exact rank as yet, but ready at any moment, eager for the hardest task, never asking for for the hardest task, never asking for rest, quick-witted, resourceful, officers as well as Prince had developed a habit of turning to Beaupre for serv-ice after service. And always they were met with a glad consent which encouraged them to ask more until the Prince said;

at the Place d' Alton, Beaupre was to go back and bring them to join the Prince. In case of failure they were to be his reserve. The Place d' Alton barracks lay between town and ram-parts, to be reached from the town side only by a narrow lane; but the ramparts commanded with a large open space the yard where the sol-diers assembled. If the Prince entered from the town side from the street. diers assembled. If the Prince entered from the town side, from the street. Panbourg Pierre—only an escort could go with him. If he went by the ramparts the whole enthusiastic fourth artillery might be at his back. This then was the route chosen.

cers about his Highness saw that some one had blundered. Someone in the van a man had lost his head, had the van a man had lost his nead, had forgotten, and the compact inelastic procession had been led toward the approach from the Faubourg Pierre, the narrow lane at the side toward the city. It was a serious mistake, yet not of necessity fatal, and at all events they must make the best of it.

the forty-sixth.

He did win the forty-sixth. Something had happened to the officer sent to arouse them—another slip in the chain—and instead of being drawn up in the yard they were getting ready for Sunday inspection, but they flock-ed to the windows at the noise, they rushed into the yard at the name of Napoleon. An old sergeant of the Imperial Guard ran forward and kiss-Imperial Guard ran forward and kissed Prince Louis' hand, and the reserved face lightened—he knew the value of a bit of sentiment with Frenchmen; he was not wrong; in a moment the line regiment had caught up the cries of "Vive l'Empereur!" raised by the artillerymen, and the earlier scene of the Austerlitz barracks was being repeated here. Prince Louis, pale and composed in the center of the roar of voices, the seething sea of excitement, heard a word at his ear and turned.

"Sire, it is success. I go to bring up your Majesty's other regiment," Francois said, and the Prince answered quietly:

quietly:

"Yes, it is success. Go, mon ami." In a moment the messenger had thrown himself on the horse of an arthe recoiling mass, down the lane, and out to the Faubourg Pierre. In the free street he galloped the horse, through the windings that he had earned with this moment in his mind. The third was drawn up waiting, and a shout like a clap of thunder greeted his news. Buoyant, proud, he took his place by the colonel at their head. and gaily the joyful march back be-gan. The sun had come from behind the clouds of early morning and shone gloriously on glancing steel, on the brilliant swinging line of the regi-ment. Low branches of trees brushed Francois' shoulder as he rode and the touch thrilled him, for he knew by it that this was true and not a dream and he, Francois Beaupre, was leading a regiment of France to Frances

Emperor. •
Suddenly a man galloped from a side street, in front of the advancing troops; he stopped, saluted, called a word. It was not a day to take any thing for granted; Colonel Couard halted the regiment.

"The arsenal," the man gasped "They have taken Monsieur de Per signy prisoner. Monsieur le General Voirol is on his way, but he is dis-Voirol is on his way, but he is distant. It is a step from here. The third artillery could arrive there he fore him—they would surrender—Monsieur de Persigny would be released"—he stopped breathless.

The colonel turned an inquiring look on Francols. As the Prince's messenger, as the man whom he had seen closest to the Prince's person, he deferred to him and Processon, he deferred to him and Processon.

senger, as the man whom he had seen closest to the Prince's person, he deferred to him, and Francois realized that he must make, and make quickly. a momentous decision. The arsenal was immense and lightly guarded. De Persigny had been sent with a small force to take it, for the ammunition it held might at any moment be of it held might at any moment be of supreme importance. It seemed that the detachment which guarded it had been underrated, for it had made pris-oners of De Persigny and his men, and this aide-de-camp had alone es-

of his decision, one of them? We reatness to know and not the part of a mind capable of greatness to know and grasp the flying second of opportunity? Would not the Prince represent him, if he stupidly let this one chance in a thousand go by, for servile fear of disobeying orders? He had left his Highness safe with two regiments at his back; this other rould do possing at the Piece & Allen He had left his Highness safe with two regiments at his back; this other could do nothing at the Place d' Alten barracks but swell the ranks; here, by a turn of a hand, they might win for the cause the very blood and bones of success, a mighty arsenal, and for themselves honor and gratitude from their Emperor. In Francols' mind was a touch of innocent vanity that he should have the power to render so signal a service, yet no thought at all for himself or for the honor he might gain, or lose; whole-heartedly he weighed the reasons why or why not it would be best for the Prince.

The aide-de-camp's voice broke in. "My Colonel, I beg you, I implore you, save Monsieur de Persigny. The Prince loves him—he will be very angry, if he is left helpless—they threaten to execute him—I myself heard—I impore you, Monsieur le Colonel. For the rest, it is indeed the moment of fate to win the arsenal."

Francois' face lit with a fire of decision. "My Colonel, it is for the Prince—it would be his will—we must not let slip the gift of destiny. To the arsenal!"

not let slip the gift of destiny. To the arsenal!"

the arsenal!"

And while orders rang out sharply and the regiment wheeled into sliding lines that doubled and parted—and flowed together again in an elastic stream toward the looming arsenal, Francois, with a quick word to De Persigny's aide-de-camp, was writing rapidly on a bit of paper.

"You will take this to the Prince at once," he ordered, and the young offi-

once," he ordered, and the young offi-cer saluted, for he, too, knew, as most of them did, this man's anomalous yet strong hold on Prince Louis.

Francois rode again to the colonel's side, and he did not doubt that he had decided rightly.

CHAPTER XXXIII.

The Accolade at Last. It is a common tragedy that men, being human, cannot see all sides of a question; that a decision right in one light may bring disaster in an other. It events had stayed where he left them, Francois Beaupre and Colonel Couard and his regiment would have won honor and eternal gratitude from Louis Bonaparte for the quarter of an hour's work which made the arsenal theirs. Events, instead of the araenal theirs. Events, instead of standing still, or going forward, took an unexpected sinister turn, not long after Francols' going.

The happy Prince, smiling the shad-owy smile which made his face win-ning, stood in the center of triumphant

ning, stood in the center of triumphant turmoil; his new followers, the men of the forty-sixth, crowded about him shouting, cheering, kissing his hands, and the loyal fourth artillerymen fra-ternized, embraced, congratulated the men of the line regiment. The narrow courtyard was a hubbub of raptureus excitement, and the Prince's officers— Montholon, Vaudrey, Voisin, Parquin, D'Hunin, Querelles—these and others whose names Frenchmen knew, sur-rounded the small figure which yet had so much of royalty, and laugh and chatted light-heartedly. In a few moments, when Colonel Laity's engineers and the third artillery should have arrived the Prince would have five thousand men under his command. The great game was practically won—Prince Louis was all but Em-

Suddenly, above the sea of sound, commotion was heard at the farther end of the barrack yard. The colone of the forty-sixth, Colonel Talandler, had arrived. Very loyal to Louis Phillipe, very angry at the scene before him, he would not believe the news He called excitedly, and the men's voices died down as they saw him

gesticulating.
"Soldiers," he cried, "you are d ceived! This man for whom you are shouting is an adventurer, an im-postor!" In the shock of silences which fol

lowed his words, another voice rans out, clear and indignant, the voice of a staff-officer whom they all knew, "It is not the nephew of the Emperor! It is the nephew of Colonel Vaudrey! I recognize him!" the offcer cried in a strong staccato, and a gasp as if ice-water had been scat-tered went through the crowded

There is nothing more absurd in his-tory than the instant effect of this quick-witted lie. Only with a merquick-witted lie. Only with a mer-curial French mob, perhaps, could it have succeeded, but it succeeded here with hopeless swiftness. It flew from mouth to mouth—they were cheated, tricked; the Emperor's nephew, their Prince, had not come; this young man was a make-believe, a substitute, the nephew of an officer; some of the soldiers who had shown most enthus-less almost lost their minds new in asm almost lost their minds now in

Colonel Talandier began to form his men; the Prince, composed as ever, yet earnest, swift, tried to rally his, but it was impossible to start anywhere, in this confusion, for line and artillery had become mixed in an unmanageable moh. A word from either

Then, quickly, he was himself again. Serenely while the maddened soldiers pressed on him, he turned and spoke a quiet word to his friends, and then, serenely, too, with a gaze that was

a quiet word to his friends, and then, serenely, too, with a gase that was half contemptuous, half friendly, he let himself be made prisoner.

Yet the fight was not all over even now. On the ramparts, where the Prince and his column should have been, had gathered from the Fanhourg Pierre a formidable crowd, who advanced angrily to his rescue, and pelted the line regiment with stones, and cried again and again, "Vive l'Empereur!" Colonel Talandier had to reckon with a many-sided trouble. But the heart of it was in his hands, and slowly order and the old rule were coming ly order and the old rule were coming

The tumult of the struggle had quieted, the volatile forty-sixth regiment, returned to its allegiance, stood formed in ranks, in appearance as firm for the king as the everlasting hills, and, at the end of the court was a sad and silent, yet a stately group of men, the Prince who had almost been men, the Frince who had almost been Emperor and those who had watched, slipping with his hope, their hopes of

grandeur. Suddenly a horse's hoofs rang down the lane from the Faubourg; a rider clattered at gallop into the yard and across the front of the soldiers, and every one in the agitated company-saw that the man reeling in his sad-dle was wounded. With blind gaze he stared about as he relued in, and then he caught sight of the sorry group, the Prince and his officers. To Francois Beaupre, clutching to this world by one thread of duty, this was the victorious Empered. the victorious Emperor and his tri-umphant staff. With a choking shout he threw himself from the horse and fell, too far gone to stand, at the Prince's feet.

"Sire, I bring you the arsenal," he stammered painfully, loudly. In the silence of the courtyard one heard every word. "Two wishes—good fair-ies—" he gasped, And then, his mouth twisting to a smile, "the third—is no matter.

Louis Bonaparte looked down at the man whose dying face stared up at him in a rapture of loyalty; whose life had been consecrated to him; whose death was for him; who had lost him an empire. For a second a struggle shook him, and then the large kind-ness through which he came nearest to greatness, overflowed. In the career to come was no finer moment, no higher inspiration for Prince Louis

Frenchmen all, shaken with the living drama, the rulned men who stood about a defeated Prince cried it for him—the old magic cry of the Bonspartes. With kepis lifted, as one man, "Vive l'Empereur!" the deep voices cried, hailing a lost cause for a lost life. But only the Prince knew that a thought came after; only he caught, on the gasp which let the soul out, regirl's name. Damned With Faint Praise.

An estimate of the valiant Roderick Dhu as recorded by an elementary school student of "The Ledy of the Lake" was this: "His character was pretty good because he always liked hunting, he looked pretty fair, he was useful in shooting and fight, and was a truthful man."

The other day the H. Lieber company, among other pictures displayed in the show window, had one that attracted special attention. It was a large picture representing an immense floness and four cubs. Together with the praise bestowed on this group, there was some criticism. "Whatfool artist got up that picture?" said an elderly observer. "Anyone ought to know that two cubs is the limit for any lioness. This word picked up any lioness. This word picked up by a listener was taken into the picture house. Considering the success with which corn can be produced, and the advantages to be gained by so producing it should not it receive the serious attention of the western agriculturist?

Corn is successfully grown in the northern part of Minnesota in similar soil and under the same climatic condition, and there does not appear to be any reason why like results should not be secured in western Canada. It is the opinion of many American farmers of experience that the corn belt is extending northward. The prairie provinces must gradually take up with mixed farming. More stock on the farms must be raised, and in on the farms must be raised, and in consequence farming must to some extent be diverted from grain growing to other necessary crops. If crops suitable for wintering cattle and espe-cially dairy stock are to be grown, why should not corn be one of these crops? It kills in our country every year more men and women than any other allment except two—consumption and pneumonia. Bright's disease and uric acid poisoning usually start in some kidney weakness that would not be hard to care, if discovered early, so it is well to know the early signs of kidney disease and uric poisoning.

When uric acid is formed too fast and the kidneys are weakened by a cold, or fever, by overwork, or by overindulgences, the acid collects, the blood gets impure and heavy, there is headache, distinces, heart palpitation, and a dull, heavy-headed, drowsy feeling with disturbances of the urine.

Real torture begins when the uric acid forms into gravel or stone in the kidney, or crystallizes into jagged bits in the muscles, joints or on the nerve tubings. Then follow the awful pains of neuralgis, rheumatism, gout, sciatics, neuritis, lumbago or kidney colie.

In a Roman School.

The Osservatore Romano, the offi-cital organ of the Holy See, relates that in one of the female see schools of Rome the teacher of history is an atheist and that recently, while explaining the crusades, she asked her pupils whether they believed in Jesus Christ. All the young girls replied in the affirmative, whereupon the teacher sadly shook her head and said it was a pity that not one girl was sufficiently intelligent to be an atheist.—Chi-

Whole Family Benefited By Wonderful Remedy

There are many little things to annoy us, under present conditions of life. The hurry, hard work, noise and strain all tell on us and tend to provoke nervousness and irritability. We are frequently so worn out we can selther eat, sleep nor work with any comfort. We are out of line with ourselves and

others as well.

A good thing to do under such circumstances is to take something

Dr. Miles' Anti-Pain Pills

to relieve the strain on the nerves. Mrs. J. B. Hartsfield, 33 Corput St., Atlanta Ga., writes:

"I have on several occasions been varily relieved by the use of your meafeines, especially the Anti-Pain Pills, which I keep constantly on hand for the use of myself, husband and two sons. Nothing in the world equals them as a hendeche remedy. Often I am enabled by the use, of one or two of the Pills to continue my housework when otherwise I would be in bed. My husband joins me in my praise of the Anti-Pain Pills and Newvine."

Dr. Miles' Anti-Pain Pills

are relied upon to relieve pain, nervousness and irritability in thousands of households. Of proven merit after twenty years' use, you can have no reason for being longer without them.

ORIGIN OF THE SANDWICH. ORIGIN OF THE SANDWICH.

The first sandwich, so called, was made of two large slabs of bread with a slice of ham between, and was devoured by the fourth earl of Sandwich, who was born 195 years ago, on November 3, 1715. This earl, like most of the English nobles of that time, was devoted to games of chance, and it was this predilection that was responsible for the application of his name to the sandwich. When the stakes ran high the belted earl was unable to tear himself away from the gaming table, and it was his custom to order servants to bring him slices of bread and ham. Other devotees of the goddess of luck followed his example, and gave the name of "sandof the goddess of luck followed his example, and gave the name of "sandwich" to the combination of bread and meat. The passion for gambling is no longer so prevalent as in the earl of Sandwich's day, but the rush and hurry of modern life have given the sandwich a wide popularity, who would "get filled quick" at the expense of direction and health. The public of digestion and health. The noble who invented the sandwich was long first lord of the admiralty and held other high positions in the English

A few years of school dental clinics have made "toothbrush drills" a familiar idea in many cities. It took the Toronto public nurses, or rather their supervisor, Lina L. Rogers, to originate another drill quite as unique and important, says the Survey. Since last October the school children of Toronto, in squads of 20, have prac-ticed daily "nose blowing drills" and the effect on the freehass of the at-mosphere of the schoolsrooms has been so noticeable that the teachers have become assiduous in seeing to it that no child comes to school unpro vided with a pocket handkerchief They often, indeed, themselves order the drills without waiting for the com ing of the nurse. The effect of the drill is perceptible already on individual children, in cases of catarrh, and the doctors predict that it will have an appreciable effect in time in lessening adenoids and other throat and nose affections.

The discovery is said to have been made that milk kept in red bottles will remain sweet and pure longer than when kept in plain glass or other colored bottles. Experiments have been made with the spectrum to determine which of the rays of light affect milk and it has been found that it is the rays toward the violet end of the spectrum that do the mis-chief. The red ray is stronger and more penetrating and probably has some neutralizing effect upon the lacteal microbe. If experiments confirm the theory that the red bottle preserves the milk better than the b now in use, the red bottle should be adopted generally. Such a change will create a new set of milk bottle mil-

An individual shaving cup for each shave or shaver is the latest sanitary barber shop innovation, for which a patent has been obtained by a Vermont man. The cup is made of paraffin paper with a thin layer of soap, sufficient for a single shave, coating the bottom. When this has been used it is intended that it should be thrown away. This greatly reduces chances of any exchange of disease germs taking place through the me-dium of the barber's chair.

In time of kidney danger Doan's Kidney Plits are most effective.

Plenty of evidence of their worth.

Mrs. John Stevens, S. Oak St., Arcola, Ill., says: "I suffered for a year or more rom a severe paid in my left side, just over my hips. I had frequent attacks of dizzinces and was devoid of energy and ambition. The kidney secretions were unnanterel and I didn't aleep well. As time passed, I got worse, but I'd d not know the exact cause of the suffering. One day I read about Doan's Kidney Pills and deciding to give them a trial, I got a box. By the time I had taken half the contents, I was greatly relieved and I continued to improve. Two and a half boxes of Doan's Kidney Pills completely cured me. During the past three years, I have been free from kidney complaint. I publicly recommended Doan's Kidney Fills when they cured me, and many people who have seen my statement have questioned me about my experience. Officials of Miners Claim They Wanted to Continue at Work Until Trouble Was Referred Rank and File.

Columbus, Ohio. — Ohio soal mine operators stood firm and 600 coal mines, employing approximately mines, employing approximately 50,000 men, suspended operations because of the failure of the miners and operators to reach a new wage scale agreement. The present wage agreement has expired.

Final conference here resulted in a deadlock. No further attempts were being made to bring about an eleventh-hour agreement.

Officials of the United Mine Workers said the miners did not want to suspend work. They suggest a referendum to decide on a satisfactory wage scale. Operators, however, decline to wait, declaring "we cannot run the mines without knowledge of what the coal will cost."

Suits to Test Law.

Neither operators nor miners' of-ficials would predict how long the sus-pension would continue. It was ad-mitted, however, that duration of the idleness is dependent on the outcome of further negotiations for a wage scale agreement mutually satisfactory to both factions and a test suit in the courts to determine the constitution-ality of the Ohio mine-run basis pay-ment law, which becomes effective May 15. Suits already are prepared to test the latter, it was said.

Thousands of miners in the Hock

MEETING HELD IN CHICAGO

dward F. Dunne Declares liftnote to Third in Population, Wealth and Political and Commer-cial Importance.

Springfield.—The need of better roads in Illinois was emphasized by Bov. Edward F. Dunne, speaking be-fore the Illinois Highway Improve-ment association at Chicago. "The Illinois roads are a disgrace and a scandal," said Governor Dunne. "The state ranks twenty-third in point of road improvement, with only ten

f road improvement, with only ter er cent of the roads properly con

structed.

"If my influence can help the situation, however, the next ten years will see this state take its place among the leaders in road improvement."

Governor Dunne said in part:

"Illinois is the third state in the funited States in population, wealth and political and commercial importance.

"It is the premier agricultural state of the United States. Its soil, on the of the United States. Its soil, on the average, is three times as valuable in selling price as the average soil of the United States, and yet in that important feature which gives value to the farm, to-wit: the roadways which lead to its gates, illinois is scandalously and deplorably in the back ground as compared with most of the other progressive states of the Union.

roadways to unimproved roadways, Illinois holds today the hoodoo number of 23. In other words, 22 of the states of the United States have a greater ratio of improved roadways to unimproved roadways than has the great state of Illinois.

"I was surprised to find upon inves-tigation within the last 24 hours, that Illinois has a smaller percentage of improved roads than has the United States in general. In other words, the average percentage of im-proved roads to unimproved roads in the whole of the United States on December 31, 1911, was ten and one-tenth per cent, while the average in the great state of Illinois was only nine and forty-seven hundredths per-cent on the same date. This situation of affairs has been, and is, a reproach to the intelligence and a blemish on the reputation of this state.

"Most of the public utilities of our "Most of the public utilities of our state were under the control of private hands of corporations, practically without statutory or administrative regulation, until the year 1914. All of these utilities, however, ewned by private corporations, have been, by the action of the last legislature, brought within the control of the public utilities commission of the state of Illinois, and will be compelled by that commission to give decent service to the public at reasonable rates; but the public at reasonable rates; but the greatest utility of all, to-wit: the public roadways of the state are absobublic roadways of the state are abso-lutely under public control and in pub-lic ownership, and yet the public of the state of Illinois, owning and con-trolling this greatest of all utilities, has failed in its duty to give decent transportation to the farmers and citizens of Illinois, by making these roads decently passable."

Will Punish Alleged Druggists.

The state board of administration started a campaign to put out of business druggists in the state who have been selling cocaine, morphine, heroin and other neurotic and narcotic drugs in Illinois in violation of the law.

A list of five Chicago and five downstate druggists who have been making a practise of selling drugs of the character and to whom many inmates of the state insane hospitals attribute their downfall, is given in a letter sent to the state board of pharmacy by the board of administration with the request that they be prosecuted.

Meeting of Apple Growers.

More than one hundred apple growers from ten states met in Quincy to attend the annual convention of the Mississippi Valley Apple Growers' association.

The meeting was devoted to the discussion of apple growing and an address by Prof. Charles Pickett, head of the horticulture department in the University of Illinois.

James Handly was re-elected secre-fary and Henry C. Cupp of Quincy suc-ceeds Richard Dalton of Saverton, Mo., as president.

Command Means That Christian Must Walk With the Savior, Not Far Behind Him.

CHRIST'S command today, as in the days when he was gathering the Twelve about him, is "Follow me." The company of those who are so close to him that they are, walking with him has always been small. But beyond count is the number of those who are following at a distance.

Among the doubtful company are a great many who are backsilders. There was a time when they were near to him. They delighted in his word, they thought much of him, they tried to confrm their lives to his teaching. They are still following him, but it is at such a distance that they would hardly be suspected of belonging to his company.

There are some in that company who make no profession of following him. Yet without being conscious of it, they have obeyed his teachings and exhibit those graces of character which he exalted. They are following, but it is at a distance.

Whether they are in church or out of it, one of the reasons which keeps them at a distance is a cold heart. We might as well expect a locomotive to keep up with its schedule with ice in

them at a distance is a cold heart. We might as well expect a locomotive to keep up with its schedule with ice in the fire box instead of fire, as that a man with a cold heart should follow Christ closely. Peter did not follow Christ afar off until his love had cooled, and his Lord pointed to that as his one defect when he asked three times, "Lovest thou me?" If we shirk our work it is because we do not love it. If we neglect our home it is because we do not love it. If we follow Christ at a distance it is a proof of small measure. small measure

Weakness of Faith Another cause for following at a distance is weak faith. Peter had once confessed his faith in his master as "the Christ, the Son of the living God." But he could not have repeated God." But he could not have repeated that confession in the high priest's palace. The weakness of his faith was expressed by his distance from Christ. There is hardly one of us whose life would not be transformed by a strong faith. The Lord has said, "Seek ye first the kingdom of God and his righteousness and all things shall be added unto you." If men believed that, our churches would be thronged. The kingdom of heaven would suffer added unto you." If men believed that, our churches would be thronged. The kingdom of heaven would suffer violence and the violent would take it by force. The rush and stir of business would be transferred to the church, and the quietness of the church would settle down upon husiness. The Bible says: "There is no other name under heaven, given among men, whereby we can be saved." If we believed that, we would not give other things first place and ask God to wait our convenience before we accepted his Son or became witnesses for him. If we had faith as a grain of mustard seed we would walk with Christ, not far behind him. Must Be No Defects.

Such distant following produces a most unsatisfactory character. A great defect in third or fourth rate work is hardly noticed, but a very small defect in that of greatest worth is not tolerated. It is an unmistakable evidence of the loftiness of the Christian life that a small defect is so severely criticised. Even the man

Christian life that a small defect is so severely criticised. Even the man of the world finds fault with a half and half Christian. God's estimate is even more severe. "Because thou art neither cold nor hot, I will spew thee

out of my mouth." of happiness. If we know enough of Christ to follow him at a distance, something of the better pleasures he promises, the better fellowship he of-fers, the inheritance eternal in the neavens which he has prepared, we know too much to be content or happy so long as a gap separates us from

The position of distance is the position of danger. The straggler in the army often runs a greater risk than the soldier in the front rank. The master stroke of the enemy is to separate us from Christ, then he can easily overwhelm us. If we follow at a dis ance we are inviting ruin. We shall not fall before temptation unless first the heart is cold, and faith weak Beauty of character, happiness, safety, is found only near his side.

"Holy Writ."

The life of every true Christian man is a living epistle, vibrant with virtue, quivering with the instincts and impulses of a vitalized spiritual experipulses of a vitalized spiritual experience; and known of all men as a testimony to the living God. Fenelon
says that it is "better to be a good
living book than to love good books."
The book bound in leather may indeed be "good value," but the book
bound in human nature, which walks about on two legs, will often carry a about on two legs, will often carry a message for heaven in ways, some of them byways, never visited by the products of the printing press. A man as well as a Bible may be "Holy Writ"—that is, writ upon by the finger of God, and signed and sealed by the spirit of the eternal. Such a man can never, like a book, be put upon a shelf, for he is in himself a whole circulating library.—Zion's Herald.

Cause of Misunderstanding.

A very great part of the disputes in the world come from our having a keen feeling of our own troubles, and a very dult feeling of our neighbors; for if the case were reversed, and our neighbor's condition became ours, ten to one our judgment would be reversed likewise,—George Macdonald.

It may be interesting to note that ten the United States agricultural partment experimented on the distibility of cheese a few years ago named as the most digestible seeses, besides the so-called America cheese of the first quality. Swissourefort, Camembert and cottage seese. Another point which the government bulletin pointed out was that as should be taken in using cheese sooking not to hum it or even cook thoroughly, for there are various cooking not to burn it or even cook thoroughly, for there are various eastive disturbances which might see from the consumption of burned decomposed fats. For this reason preparing dishes "au gratiu"—at is, dishes baked with a sprinkling cheese—the cheese should not be ded till the cooking process has an completed. The cheese should added at the last moment and sired merely to melt, but not to burn.

e Italian who makes his midday ch on bread and cheese and a little ens dressed with oil and possibly a greens dressed with oil and possibly a little light wine and sweet, ripe fruit has about as sensible and as well-pro-portioned a meal as he could get, though he had studied the science of dietetics all his life.

One of the best ways to make use of the food value of cheese is to use it on vegetables.

Orange Mint Salad-To serve with lamb. Remove the pulp from four arge oranges. Sprinkle with powdered ugar and add one tablespoon each of inely chopped mint, sherry and lemonutee. Fill some halved orange skins with the pulp; garnish with sprigs of

Orange Salad—Cut the peel from six oranges, carefully remove all pith and cut the pulpy pieces as if in natural divisions, sprinkle over these a little ever so finely chopped tarragon and chervil, a dessertspoon of olive oil, a dessertspoon of brandy and a pinch of sugar. Pile on a dish and serve very cold. (Chopped watercress may be substituted for tarragon and chervil.)

Orange Salad—Cut thin silces of oranges crosswise, lay them on lettnee leaves, sprinkle with pineapple cut in dices and the meats of shelled walnuts. Pour over three tablespoons of olive oil, mixed with one of lemon juice, and season with a speek of cayenne and some salt, and very little Orange Salad—Cut the peel from six

one and some salt, and very little stor sugar.

How to improve Pot Rosst.

When the meat comes from market there is usually a quantity of seemingly superfluous fat with it. Do not cut this off for rendering purposes, but make use of it in the following manner: First, cut the fat into strips about one-half by one inch in thickness. Make incisions in the lean portions of the meat about two inches apart. Five or six of these in a sevapart. Five or six of these in a seven-pound roast will be sufficient. Insert the strips of fat in these holes and trim the protruding portion even with the surface. This method followed before basting will be found to do away with that devenes which to do away with that dryness which is so much in evidence in the pot roast.

Little Home Helps. When froning a blouse with buttons on it, it is often found difficult to fron the material around the buttons. Try this hint and save time: Take a rough towel folded several times, lay the buttons face downward on it and iron over the backs. The buttons sink into the soft towel and the material is quickly made paraettle.

When scissors become dull, put a pin between the blades and rub it up and down, working the blades as in cutting. This will put a new edge on the scissors and takes but a moment's

New Chocolate Daintles.

Chocolate sardines are a recent addition to the list of chocolate dainties. They are dapper little fish, three or four inches long, packed in proverbial fashion into a tinfoil box which is a good imitation, even to the gilt let-tering, of the box their fishy brothers eked in. Another chocolate dainty is the but-

terfly. With wings outspread—and that is the only way he can hold his wings—he measures four or five inches across. He comes in a box shaped just to fit him, decorated on its cover with a butterfly in colors.

Bolled Dressing.

Cream four yolks, two tablespoons sugar, one ball of butter, one teaspoon ful mustard, cayenne pepper and salt. Let come to a boil one-half cup of vinegar and one-half cup of water, thickened with one tablespoon flour and pour over the above mixture. When cold and ready for use mix with plain cream.

Good Bread Rolls. On baking day have some bread rolls as well as the loaves. When the sponge has risen once knead it down and form it into small balls. Drop these into muffin pans, let them rise until light and bake a golden brown.

Nut Filling. Put half a cupful of milk, the same of butter, and two cups of white sugar into a double boiler; boil until it "ropes," remove and beat a little; add "ropes," remove and beat a little, cupful of chopped nut meats and ad at on

"You see," he went on, "It is just that little more that is so very much—the little more of kindness and goodwill. A mother praying for her boy tonight would bless you if she knew."

"Maybe she will know, some day," said Betty, softly. "If I knew who and where she was I would, write to her."

"I know where she is," said the soldier. "The boy who lies here was an old playmate of mine and his mother lives in a little town in Maine. I shall write to her tonight. Will you send her a message?"

"Yes," said the girl, impulsively. "Give her my love and tell her that this 'grave shall be my special cars. That I shall tend it and at least 12 times each year she may feel sure that there are flowers on it."

Then her mother came and Betty, with a little friendly nod, left him. It would be hard to tell whose thoughts were the burlest with the other for the next few days.
