purchasing from the manufacturers
thus saving to my customers the profit
of the wholesale dealers.

I have now on hand a large stock of
the various kinds of Stoves consisting
in part of Cooking, Parlor, Casket,
Air-tight and the Golden Egg (a rich
egg it is), Coal, &c., &c.

To sum it all up, almost any kind,
size, shape, or price one can wish.

PLAIN TIN WARE.

Anything from a rattle to a churn, or
a whistle to a bathing-tub. To say
the least, anything that can be made
out of Tin, Sheet Iron, Copper or Zinc
can be had at CARTER'S.

ILLINOIS CENTRAL RAIL ROAD

LANDS FOR SALE.

THE ILLINOIS CENTRAL RAILROAD
Company have the services of a Agent and
Broker to sell the lands belonging to their
Road which are offered for sale upon
terms, and for cash, as follows:

It is the policy and wish of the Company to
sell their lands to actual settlers, and no in-
dividuals, in order to stimulate the same
will be sold to speculators, until after the
first offering of lands.

Illinois is the most cross-division of the
Western States, and comprises the most
fertile portion of the belt of land extending
from the Atlantic Ocean to the Mississippi River
and including New York, New Jersey, Penn-
sylvania, Ohio, Indiana, Illinois, Michigan,
Wisconsin, Iowa, and Northern Minnesota.

Unlike the States North of us, the produc-
tions are not destroyed by rigorous winter,
nor is the soil of summer oppressive. The
land West of the Missouri River gradually
and rapidly increases in fertility, till they blend
with the Great American Plains, and bring
candy. Many millions of dollars are
spent annually on the culture of the

various kinds of timber.

The lands between the line of the pro-
posed roads in Iowa, have been taken up, and
are now selling at \$10 to \$15 per acre, although
settlers have to pay heavy freight upon the
transportation of their agricultural tools, fur-
niture and goods, and when their crops are
produced, the cost of transportation is added
to the general increase of the cost of production.

Looking to the future growth of our country
this State, which contains the most favorable
temperature with the richest soil, and most
healthy climate, will for all time be the great
grain producing State. It is full of mineral
wealth, such as Coal, Iron, Lead, Tin, Mica,
etc., and has a large number of churches
and schools, and of the in-
vestments of money, and the appearance
of a country in Illinois will be the not of supply
of timber. The number of acres of the State
includes at least 10,000,000 acres of the best
quality of timber land, and the extensive pine-
forests in adjoining states, accessible by the
Lakes, furnish Chicago with an immense quantity
of timber and lumber, amounting in 1856
to 400,000,000 feet.

Illinois, especially during the last ten years,
has been rapidly developing her resources.—
The population is now about 1,500,000, and
eighty millions of dollars have been expended
for Railroad's which, with the waters of the
Mississippi, Illinois River, the Michigan Canal
and Lake communications, afford cheap and
convenient means for the transportation of her
products to every market. About one million
acres of the Company's lands have already been
sold, and many flourishing villages spring up
as rapidly increasing prosperity of the country.
Such is the facility and economy with which
these lands can be cultivated, that in two
years farmers can easily surround themselves
with all the comforts of old settled farms in
the Eastern States, and such is their fertility
and productiveness, that property purchased
at from \$6 to \$30 per acre at six years credit
and three per cent. interest, can be fully paid
for within that time, together with all the costs
of improvement, by ordinary industry, from
the profits of the crops.

Although it is evident that lands in the vi-
cinity of rail-roads in Illinois will advance to
\$40, or even \$100 per acre within ten years yet
the interests of this Company are more ad-
vanced by placing their property in the hands
of farmers, to settle the country, relying upon
the business of the road for its chief profit, and
to enable it to discharge its obligations to the
State. These considerations induce the policy
of rapid sales, which have been progressing and
increasing for two years past, and will be
pursued till the lands are finally disposed of.
No encouragement is given to speculative pur-
chasers, as the Company does not wish to dis-
pose of any of its lands except for actual set-
tlement and cultivation. It is evident, there-
fore, that the best interests of settlers can no
where be as well promoted as by purchasing and
settling upon these lands.
