Leisure is sweet when it follows work well done.

Bolin's Corner

VOL. 1 JANUARY 18, 1929 NO. 49
Published in the interest of the People of Sullivan and the Farms and Farmers of Moultrie County.
TENNIE BOLIN
Editor.
EDITORIAL
As much as we dislike to moralize in these little editorials of ours we just can't help mentioning that this whole week is National Thrift Week, commemorating the birthday of Benjamin Franklin.
TRACTORS ARE HERE
We unloaded a big shipment of tractors from the factory Tuesday—5 McCormick-Deering 12-20 and four Farmalls. There will be a big demand for tractors this spring. Get your order in early and be assured of a tractor when you want it.
Jim—"How did that fellow get into the boss' private office?"
Gene—"Threw a corkscrew over the transom."
SAW SUNNY JIM
Gene Campbell, Carl Dick and A. E. McCornie were at a Shrine meeting in Springfield last Thursday and saw Sunny Jim Bottomley, the Cardinal star take some of the work.
Lon Grigsby who is a carpenter and knows, says "To the average mother a door is something the baby messes up with his fingers, all the older children forget to close, and father bangs to indicate he has lost an argument."
EFFICIENCY
The final achievement in thrift will come when our morning papers are printed on breakfast food.
SAME FIX
"Do you know," said the successful merchant, "that I began life as a barefoot boy?"
Well," said the clerk, "I wasn't born with shoes on either."
HARD TO DECIDE
Mother: "Why is it taking you so long to put on your dress?"
Daughter: "I can't decide just where to put it."
"These firemen must be a frivolous lot!" said Mrs. Dump-ling.
"Why?" asked her husband.
"I read in the paper that after the fire was under control the firemen played all night on the ruins. Why didn't they go home and go to bed like sensible men, instead of romping about like children?"
Citizens who claim that "money just isn't circulating in this town" is probably talking thru a mail-order hat.

Mikado
Have Your Scribblings Analyzed
Louise Rice, world famous graphologist, can positively read your talents, virtues and faults in the drawings, words and what notes that you scribble when "lost in thought."
Send your "scribblings" or signature for analysis. Enclose the picture of the Mikado head, cut from a box of Mikado pencils, and ten cents. Address Louise Rice, care of EAGLE PENCIL CO., NEW YORK CITY

If the buyer shows eagerness give him plenty of line.
Men worry a lot about their hair—when it's half gone.

Prescription He Wrote in 1892 is the World's Most Popular Laxative

When Dr. Caldwell started to practice medicine, back in 1876, the needs for a laxative were not as great as they are today. People lived normal, quiet lives, ate plain, wholesome food, and got plenty of fresh air and sunshine. But even that early there were drastic physics and purges for the relief of constipation which Dr. Caldwell did not believe were good for human beings to put into their system. So he wrote a prescription for a laxative to be used by his patients. The prescription for constipation that he used early in his practice, and which he put in drug stores in 1892 under the name of Dr. Caldwell's Syrup Pepsin, is a liquid vegetable remedy, intended for women, children and elderly people, and they need just such a mild, safe, gentle bowel stimulant as Syrup Pepsin. Under successful management this prescription has proven its worth and is now the largest selling liquid laxative in the world. The fact that millions of bottles are used a year proves that it has won the confidence of people who needed it to get relief from headaches, biliousness, flatulence, indigestion, loss of appetite and sleep, bad breath, dyspepsia, colds and fevers. Millions of families are now never without Dr. Caldwell's Syrup Pepsin, and if you will once start using it you will also always have a bottle handy for emergencies.

J. B. Caldwell M.D.
AT AGE 93
It is particularly pleasing to know that the most of it is bought by mothers for themselves and the children, though Syrup Pepsin is just as valuable for elderly people. All drug stores have the generous bottles. We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepared a FREE SAMPLE BOTTLE.

Simplicity of cooling system is a feature of the new Ford
A COMPLETE water plant is a part of every automobile as it is a part of every modern city.
The hot water around the cylinder head is drawn to the radiator to be cooled by a centrifugal water pump of new design.
The purpose of this water plant is to keep the engine cooled to a temperature that will make it efficient in operation. If it were not for this, the cylinder walls would become overheated and the pistons refuse to operate.
The cooling system of the new Ford is so simple in design and so carefully made that it requires very little attention.
The radiator should be kept full, of course, and drained once each month so that sediment will not collect and retard the free passage of water. In cold weather, a reliable anti-freeze solution should be added.
As owner and manager of this important water plant you should also see that the water pump and fan shaft are properly lubricated and the packing around the pump shaft kept in adjustment.
The entire cooling system of the new Ford is so simple in design and so carefully made that it requires very little attention.
Hose connections may also need replacement after long service. For those little adjustments, it pays to call on the Ford dealer.
He works under close factory supervision and he has been especially trained and equipped to do a thorough, competent job at a fair price.
