While at present Sullivan seems able to furnish all help needed at the factory, it is but a question of time, until people now moving here will be able to get on the factory force.

Sullivan is the smallest city in which the Brown Shoe Company has built a factory. The factory building is the best the company owns. Consequently, as the factory develops and more help is needed, Sullivan will have to show a bigger comparative growth than did Salem, Charleston and other cities which have been materially aided by their shoe factories.

KASKASKIA FRUIT FARM ORCHARD UNINJURED

While it will bear no crop this year, the peach orchard on the farm south of this city, formerly owned by J. L. McLaughlin, fared much better than many orchards further south. The new owner of the place is Raymond Hoffman and he reports that the trees are all in good condition. In many instances peach orchards, some farther south in this state, were totally killed by the 20 below zero weather last winter. Mr. Hoffn an says that the apple crop will also be very short in this locality this year due to frosts at blossoming

Long Cherished Plan Consum mated at Monday Night's Council Meeting. Payments to Be Met by General Taxation; No Bonds.

Sullivan has bought its library building. After many years of planning and negotiating with the former owners, the purchase was consummated Monday night when the City Council approved a resolution presented by the Library Board.

The purchase price is \$4,362.68 which is to be paid at the rate of \$1,000 per year for four years and the balance of \$362.68 in 1935. The council declined to issue bonds for this purchase and the money will be raised through taxation.

weak-minded or reckless. Some people who are ordinarily careful will drive past a warning sign and take it for granted that no train is coming. Some will wait for one train to pass and then drive into the path of one coming from the opposite direction. Their minds haven't developed as fast as haps on some few items the tariff will raise farm prices, but automobile construction.

In the United States in 1929, 5,975 motorists either didn't realize that a train was coming or misjudged its speed. Through these mistakes 2,485 persons lost their lives and 6,804 were more or less seriously injured. One grade crossing accident in February this year resulted not only in the death of the motorist but also in the derailment of the train, causing the death of eleven passengers and injuring seventy-seven others.

During 1928, the latest year for which statistics are available, 270 highway crossings were removed through the cooperation of the railroads and state and local authorities. At the same time, 1,697 new crossings were created. At this rate, it doesn't need any statistician to figure out how long it will take to remove the menace by separating grades.

In the meantime the only remedy is to use all your faculties for self-preservation and take it for granted that a train is coming every time you approach a crossing.-H. A. Mott, Supervisor of Health and Safety, Bell Telephone Co.

NEW TARIFF GIVES FARMERS ANOTHER TRIMMING PRICE OF BUTTERFLIES HAS COME DOWN GLENN MANIFESTS A LITTLE POLITICAL DAMPNESS

The Republicans have passed a new tariff bill. President Hoover has signed it and it is now the law of the land.

of government. In theory it protects the American producer through. While not given to the practice of blowing our and American laborer by taxing products of outside nations horn, may we call attention to the fact that frustration of shipped to this country to sell in competition with American products.

The theory of the thing looks good. In practice it is not so good however. It gives the American producer the opportunity to rob the American buyer. It is the basis on which the big American fortunes have been built.

Economists figure that the new raise in industrial rates as embodied in the new Smoot-Hawley tariff bill will cost the American people about \$1,000,000,000 per year in increased living costs. This billion dollars will go into the pockets of the specially favored interests. Prices on household commodities, such as sugar will go up. Prices will also go up on lumber and other building material. The trend of the tariff legislation is up, ever up and the American consumer pays the bill.

The American farmer has long been a stalwart supporter of the protective tariff. Congress has legislated high tarening. He protested strenuously against the injustice. So loud were his wails for relief that Congress passed Farm Relief legislation. President Coolidge vetoed it.

Along came the 1928 campaign. Farm leaders pinned their hopes for justice on Herbert Hoover. Champions of the farmers' cause, such as Senator Borah campaigned earnestly for Hoover and promised the farmers that Hoover in the president's chair meant a solution for their troubles.

Herbert Hoover was elected. He called a special session of Congress to frame farm relief legislation. The special session and the regular session that followed labored long at the task. Early in the game it became apparent that President Hoover did not want farm legislation of that kind that the farmers wanted. He wanted farm legislation of the kind that industry wanted. A useless and helpless farm board was brought into existence. It has floundered around hopelessly, accomplished nothing, gone nowhere and knows nothing to do.

Farm leaders, realizing how hopeless would be the task of securing farm relief legislation along the equalization fee plan then suggested the debenture plan. Under this plan agriculture would benefit through exportation of surplus crops. This plan had the indorsement of the National Grange and of many farm leaders. Tariff-protected industry opposed the plan. So did Herbert Hoover. It is not in the new tariff bill.

While all of this activity was prevailing relative to farm tariffs, in a special session of Congress, called to legislate relief for the farmers, industry was busy. It manipulated tariff rates, upward all along the line. It clubbed Republican leaders into line. Brazenly and shamelessly it prepared to further loot the American farmers and the Ameriwere few. Early lamb raisers cashed in their out of Shelby county's gas tax 1930 crop at three to four months of age at very good figures, in spite of the over supply of big late lambs from 1929, he said. The added profits are another argument in favor of the plan of giving lambs an early start, a quick finish and a prompt sale, he point-

> Encouraged by the better profits and other advantages, flock owners in the state are making early lamb raising more common They realize, Robbins explained, start may be sold at high prices in April and May, usually bring-ing more dollars a lamb than they ever would bring if kept until the next fall or winter. The early lambs have no losses from parasites, little risk from dogs, no setbacks from hot weather and no delay in returning the cash. In short, he said, they pay.

However, early lambs must be good to bring top prices. Good breeding and generous feeding are amply rewarded. In four Illinois counties this year, the farm advisers, in cooperation with the extension service of the agricultural college, are putting on campaigns to register improvement in quality of lambs. These counties are Adams, Clark, Marion and

The Brimstone Path

When the revivalist, Torrey, was holding meetings in London, he was annoyed by persons who disap-proved of his sermons leaving the hall. Preaching a regular hell and brimstone sermon one night, he told and president of the Men's Sunday of Bloomington, Charles Carnine had been to him because he be-lieved one of his aunts had died Community High school teaching were Sunday guests at the home impenitent. "And she has certainly staff. He will also continue his pasgone to hell," the evangelist added. A young man could stand no more, and got up and walked out. "Yes, there goes a young man who will go to hell, too," Torrey shouted. Reaching the door, the young fel-low turned around. "Yes, I'm off," he called back. "Ta, ta. Any message for auntie? True Pessimist!

"The real pessimist is he who thinks everything is as good as it can be," says a prominent man of science. It is interesting to make a surmise as to the mental processes which brought the scientist to such a conclusion. Perhaps he was thinking what our condition would be today, were it not for the hopeful men who labored to improve upon the past for the benefit of all mankind. No wonder he de-clares that the real pessimist is he who thinks everything is as good as it can be.

MISSOURI LIFE INS. CO. FORECLOSES ON BUILDING

Through attorneys Parker & Bauer of Effingham, the Missouri State Life Insurance Company has filed a foreclosure suit against Claude Whitfield, Dorthy E. Whitfield as owners and F. C. Newbould and Walter Jenkins as tenants on the property occupied by the garages of the tenants. The insurance company carries \$6,000 mortgage loan on the building. The bill sets forth that the interest due March 2nd has not been paid. The Whitfields reside in California.

This is one of the buildings built here by Z. B. Whitfield during the boom days when he was in the banking, farming, automobile and other lines of business.

There were estimated to be about one thousand people at the Ed Moody farm Sunday afternoon to witness the parachute drop. Ed Moody went up in his airplane and when about 2500 feet high Bob Hampton of this place jumped off the plane in a parachute and when about two hundred feet he pulled the cord and it opened and he made a splendid drop. This was his fourth drop and he did it nicely.

Lester Bushart and R. A. Scheer left here Sunday for Springfield where they go with the Shriner's band to Toronto to a Shriners meeting. T. G. Scheer the only Patrol in this county, attended this meeting. This is a fine trip for our men.

DO PEOPLE FEEL BETTER BECAUSE YOU PASSED BY?

His voice betrayed his irritation but he promised to call. Then he snapped the receiver on the hook and exploded.

One of them had made several million dollars in the past few years. Whenever he entered a dining car or a hotel he wanted every one to understand that he is rich and important. Waiters dislike him, even though he tips liberally I sometimes felt embarrassed by his critical demands for attention.

The manner of the other man is the exact reverse. You would never guess that he is a power in world industry. He never gives orders, but makes suggestions or very courteous requests. He seems surprised that anybody snould want to do him a favor. He can make a waiter or a station porter feel a new sense of self-respect merely by his smile.

A noted preacher once remarked that one of the finest of all saying of Jesus is this: "I have compassion on the multitude."

Said the preacher: "Many men can be virtuous. Many can be honest in a hard, self-righteous way. But how many are really considerate? How many feel instinctive respect and syn pathy? How many have compassion?"

A lot of twisted standards have somehow grown up in the world A lot of very righteous people seem to think that a man is good if he does not smoke, does not take a drink, does not do this or

Mistake That Causes Rift in Marital Life

That the clinging vine type of woman is more likely to lose the love of her husband or at least bore him to distraction, is the answer given by Anne Byrne McCall to a woman who has written for advice to the Woman's Home Com-

panion. "It is the growing reluctance of a husband to express his affection in words, caused by persistent demands that he do so, that causes the rift," says the writer. "Silence in affection is not advocated in that statement. Every woman not only wants to be loved, but she wants to be told that she is loved. But it is a pity for her to force or twist the issue so that it becomes not a question of how a man may or can express his affection, but it becomes rather almost a question of how he may defend himself or preserve his independence.

"It should not be forgotten that there are many ways of expressing love and that one man's silence might express more of his affection than the constant declarations of

a different type.
"The demand by a wife for constant reassurance that a husband loves her, when she knows perfectly well that he does, is not the way to keep a deep and large and self forgetting love."

Good Health Matter of Correct Posture

Not only gracefulness, but also our health and the prevention of excessive fatigue, depend a great deal upon posture—the way we stand, sit and walk, warns a health expert in the Farm Journal. That is why it is most important that the person who has much work to do, and yet wants to have energy left to enjoy life and to give pleasure to others, should guard against habits of incorrect posture.

Consider first the standing position. The weight should be on the balls of the feet, the chest up, the chin slightly back, but in line with the chest, the feet exactly parallel, the arms dropped easily at the sides. To see that your body is in perfect balance when you are standing, rise on your toes and sink down again. When you stand with your chest drooping, your stomach out and your spine curved, you appear at a disadvantage; and what is worse, this position causes your vital organs to be displaced.

In walking, the first thing is to start right with the correct standing position. The toes should point straight to the front or be turned in the fraction of an inch. To stand or walk with the toes pointing out produces awkwardness and often leads to foot troubles, such as fallen arches.

Lax Justice

The way rich transgressors manage to keep out of jail led Governor Martineau of Arkansas to say in

"It reminds me of a story. A man was traveling in New Mexico, and in a little town embowered in palms and flowers the mayor seemed to be quite a character. He held all the offices-judge, coroner, police captain and so forthand whatever turned up to be done, he was there to do it.

"After lunch, as he and his guest sat smoking in the garden, he turned to his clerk and said:

"'Higginson, by the way, sneak over to the roulette parlor and tell Den Juan I want to try him for that murder case."

Blue Baboon

A grotesque but humane method of repulsing wild animals is being practiced in Kenya colony, Africa. Elephants, hippopotami, bushpigs and baboons were surprised recently when they found among their number a queer animal resembling a baboon, except that it had all its hair shaved off and wore a coat of

They were so startled that they no longer return to raid the col-onists, and the idea is recommended by the official who captured the baboon and released it after transforming its appearance with a razor and paint brush.

Mimics.

A Londoner was hurrying along the embankment to keep an ap-pointment for which he was already late. He was stopped by a party of Americans, one of whom asked courteously if he would point out Cleopatra's Needle. "Why, certainly," responded the Londoner; "it's just here." He indicated the famous obelisk,

and at the same time removed his hat to wipe his brow. Whereupon the American also uncovered and gazed at the needle with reverence.

Hard Chewing Beneficial

Only a complete change of environment and diet can save most people from the advisability of three or four dental cleanings daily. If we lived on hard foods we might have molars and bicuspids that were naturally clean and resistant. The more apples and crusts we eat, the more closely we approach this happy state. And the harder and longer we chew on something we can grind up fine, the better fo gums and jaws.— Ellen Bourne in Liberty Magazine.

Bottle-Raised Apple Tree Something New

Milk-fed chickens and even milkfed porkers are no novelty, but did you ever sink your teeth into a milk-fed apple? It seems that a Brockton matron was about to set out a young apple tree and sought the advice of a nearby storekeeper as to how it should be planted.

He advised digging a hole large enough to hold the roots. Then a short section of garden hose should be put in place, reaching from the surface to the roots, before the hole was filled in. Milk poured down the tubing every day, would give the baby tree nourishment until it got strong enough to take care

Some time afterward he inquired of the lady how the tree was get-ting on. "It is doing finely," she ting on. "It is doing finely," she replied. "I give it milk every day, as you advised." The storekeeper looked stunned, then raised his hands in despair. "My Lord!" he gasped. "Didn't

Remarkable Work of Hindu Stone Carvers

The majestic stone carvings to be found on all ancient buildings in India gigantic Buddhas, the bulls and the marvelous bas-reliefs are among the wonders of the world. Equally marvelous are the fretted walls of old Mogul palaces, Fut-tehpore Sikri, and the forts at Agra and Delhi. Wonderful artists and craftsmen have worked on this hard sandstone and left us a world's heritage. We stand amazed at their skill and patience. They do not work like that in this, our day.

But the humble craft of stone cutting thrives, says a writer in the Statesman, of Calcutta, wherever stone quarries are found. The red hills of Rajputana send masses of stone to Agra, and these on the outskirts of the city are the factories of the patient toilers who chip and cut by hand, contriving grinding stones and dishes and bowls with the same instruments that cut the stones for the Taj, and carved and fretted the screen in that far-famed tomb and the deserted palaces of the fort.

Left Gentility in a Safe

Emma Calve, prima donna of Carmen fame, tells this story against herself in her memoirs, tells this story "My Life":

"I once had an English maid. She was a thoroughly good girl, truthful, honest, obliging, but lacking tact. One day, when on a long train journey, she noticed that a rope of pearls I usually wore were missing, and panic seizing her, exclaimed:

"Oh, madam, where are your pearls?"
"At home in the safe, I told her,

At Last!

The two old maids had lived to-gether in apparent harmony for more than forty years, when one, having reached her ninety-eighth birthday, died.

A relative who undertook to break the painful news to the surviving sister was afraid the shock would prove fatal, but it had to be done sooner or later. However, it turned out that her

fears were groundless. "Ah, well," replied the sister, who was only eighty-nine, brightly, "now I suppose I shall be allowed to have my tea made just as I like it."

tried, The British soldier trembles Our fortress is the good green-

wood. Our tent the cypress tree; We know the forest round us As seaman know the sea. We know its walls of thorny vines, Its glades of reedy grass, Its safe and silent islands Within the dark morass.

Woe to the English soldiery That little dream us near! On them shall light at midnight A strange and sudden fear: They grasp their arms in vain, And they who stand to face us Are beat to earth again; And they who fly in terror deem A mighty host behind, And hear the tramp of thousands Upon the hollow wind.

Grave men there are by broad Santee, Grave men with hoary hairs;

With kindliest welcoming, With smiles like those of summer And tears like those of spring. For them we wear these trusty

arms, And lay them down no more Till we have driven the Briton, Forever, from our shore.

Lose Fat Safely and Quickly

Kruschen Salts-(a perfect combination of the six mineral salts your body must have every day to function properly) purify your blood of harmful acids, and aid the kidneys and bowels to throw off waste material-the continual formation of which is probably the cause of your fat.

In this modern age of living, it's impossible to get these salts from the fancy foods you eat-but don't worry just as long as you have Kruschen Salts.

Take a half teaspoon every morning in a glass of hot waterlittle by little that ugly fat disappears, you'll feel better than ever before-years younger, more energy. You'll soon possess that enviable beauty, clear skin, sparkling eyes, superb figure which

only perfect health can impart. An 85c bottle (last 4 weeks) at Sam B. Hall's or any progressive druggist in America. Money back if Kruschen doesn't convince you that it is the safest, quickest, easiest way to lost fat.

THE SULLIVAN PROGRESS

Washington, June 18th-The Grundy tariff bill, which passed the Senate on "Hoodoo Day," Friday, the 13th, by a vote of 49 to 47, counting pairs, which assured its passage in the House, is widely denounced as the climax of "Old Guard" Republican economic in-

If technically described by what its opponents have said about it, its real title would be:

> A Bill to promote international ill will,

To destroy American foreign trade,

To retard the recovery of domestic business, To nullify efforts for farm

relief, To further increase unem

ployment, To add a billion dollars

year to the high cost of living, To repudiate the pledges of the Republican Presidential

candidate in the last campaign, To keep the tariff in politics, And for other purposes, including the repayment of contribuators to the last Republican campaign fund.

An analysis of the vote in both houses is generally accepted as proof of two outstanding facts in connection with the framing and passage of the bill; first, that the bill is an "Old Guard" Republican measure, for which the Republican Farty will be held solely re-sponsible; second, that the charges of Democratic complicity are re-futed by the fact that only five of the thirty-nine Democratic Sena-tors voted for it, three of whom have long been committed to the high protective theory and voted for the Fordney bill, the present tariff law, eight years ago.

As an evidence of the extent of the infamous character of this measure, it is pointed out that some Republican Senators deemed it necessary to explain and apologize for their votes in support of the measure including the two Senators from Pennsylvania, the highest protection state in the Union and chief beneficiary of exorbitant tariffs.

The Grundy tariff bill has long since been condemned by leading economists, bankers, business men, publicists, editors of Republican public verdict will be rendered in can. November.
