

A goal to Shoot at 5000 for Sullivan by 1940

C. BRANDENBURGER, PUBLISHER

SULLIVAN, ILLINOIS, FRIDAY, JULY 11, 1930

#### 74TH. YEAR NO. 28

5000

for Sullivan by 1940

# THOUSANDS CELEBRATED FOURTH HERE

Under Legion Auspices Very Successful Program is Staged. Fireworks Display Best Ever Seen Here.

Sullivan was host to many thousands on July 4th. The annual celebration, sponsored by the American Legion, was a big success.

The people started coming picnic dinners and reunions took Golfers Sweat early in the morning and many place in the park.

The two baseball games, one in the morning and one in the afternoon were well attended. In the morning game the Windsor Cubs defeated the Sullivan Reds by a score of 11 to 2.

In the afternoon many of the old time favorites were seen in the lineup of the Sullivan Greys. Their opponents were the LaPlace boys and a battle royal was the result. Nine innings were played

JOHN DENTON DOES **GOOD JOB OF SIGN** PAINTING FOR AVIATORS

John Denton, chief engineer at the city light plant recently painted the name Sullivan on the roof of the plant and also in other ways painted information thereon for the benefit of passing aviators

The following letter shows what airmen think of the job:

"July 7, 1980 "Mr. John F. Denton, Chief Engineer, City Light Plant,

Sullivan, Illinois. "Dear Mr. Denton:

"Your letter of July 1st transmitting a sketch of the sign painted on roof of the City Light Plant at Sullivan, Illinois was of interest its receipt I flew down there in would be even more so. order to make a report upon the lettering as you requested. The letters shows up remarkably well from the air and can be seen for several miles.

ing towns in this part of the state. Undoubtly it is of great aid to all pilots flying over that part of the country.

"Your interest in this matter is an aid to the advancements of Aeronautics, and is worthy of commendation. Thanking you for your courtesy, I am

Yours very truly, "N. R. Laughlinghouse, 1st Lieut., Air Corps, ost Operations

FRIDAY, JULY 11, 1930

currency among various people, these fanciful ideas are Oscar DePriest of Chicago? giving way before the investigations of science, but, ages must yet elapse, perhaps, before superstition shall be entirely eradicated from the minds of men."

We want to know. We are always searching for knowledge. Theories interest us, but practical application of theories always interests us more.

The government says that "moon" farming is bunk. According to "scientific" points of view it is but a remnant of superstition. Is it? We know of many farmers who will take issue with the government's scientists. They will contend that by practicing "moon farming" they have proven that there is something to sowing, reaping, breeding, etc., in the "light or dark" of the moon.

Why not put the scientific theory to a test. Let the government pit its science against the practice of a "moon farmer" and let the results tell the story.

The department of agriculture has not always shown itself infallible in the past years. .Perhaps its scientists have not mastered the field of astronomy as it affects the growth and re-production here on earth.

All of our life we have been puzzled about this matter. Hundreds of thousands of other people are evidently in the ject being to keep folks from get- judgment-and suffers according- Home Companion, can be brought

same frame of mind. Occasionally we feel inclined to think Because ye have said, we have made a covenant with that the scientists are right and then again a practical illustration of what "moon" farming does is brought to our certain individuals, then it must I have known death and with hell we are in agreement; when over-powering scourge shall pass through, it shall not come unto us; for we have made lies our refuge, and under falsehood have attention. So we are all up in the air. Can't this matter be we hid ourselves: \*\*\*\*\*\* And your covenant with death shall decided some way?

Perhaps "moon" farming properly practiced would be annulled, and your agreement with hell shall not stand; when the overpowering scourge shall pass through then show its superiority over scientific farming. It might save ian diet" with a view of prolongmillions of dollars now spent for fertilizer. It might preshall ye be trodden down by it.-Verses 15 and 18 of the 28th Chapter of Isaiah.

vent crop failures. It might solve the problems of over-production and kindred ailments which worry and fret the farmers.

We are not convinced that "moon" farming is bunk. We would welcome a practical competitive demonstration. Just because the government says a thing is so, does not make it so if it don't prove out. Scientists are just fellows blundering around in a big universe. Occasionally they guess right. In a hundred years from now other scientists will laugh at the blunders our present-day know-it-alls made in all good faith, but with very little of understanding. -Lis all and a building for a

Herbert Hoover is unfortunate in his associates. We have always had a high opinion of Mr. Hoover, although we don't think so much about his political affiliations. As has been said before, he may have been a great engineer, but as We've got route 132 all lined up from Sullivan to Dalton City. The contracts will be awarded and the road is to a practical politician he is a fizzle. His statesmanship remains to be proven.

Elected to the presidency by the Republicans and Sullivan must not stand still. A city's work is never Hoovercrats, it became incumbent on the President, as the acknowledged head of his party, to select a chairman of the **Republican National Committee.** 

Instead of doing the obvious thing and selecting the Virginia Hoovercrat, Bishop Cannon, the president went far afield and fared worse. He selected a southerner by the name of Claudius Huston.

The President's selection at the time it was made was hailed as a wise move. It would tend to keep the renegade Southern Democratic states in the Hoover camp.

There seems to be something radically wrong with road. It is of great importance to Sullivan. It is of equally white Southern Republicans. You will remember how the president tried to name a North Carolinian to the Supreme Court bench and how very emphatically his decision was city to the southeast, may we inquire what's wrong with rejected by the Senate.

But Claudius Huston was named. This was a strictly They deserve some state hard road improvements once personal appointment. The Senate nor any other body had in a while. They are entitled to them. The logical road for antyhing to do with it. He was President Hoover's choice. Alas, alack! Claudius has proved a fizzle.

These southern Republicans are but a sad experiment.

"Like many other fallacies which have gained wide southern friends will approve of, why not name the Hon

We sincerely hope that the President will not pick an other Claudius. We don't want our Republican friends embarrassed any more than absolutely necessary in the forthcoming campaign. They have enough to answer for already.

economy.

That is the reason the Ford car has given such satisfactory service to millions of motorists all over the world and has been chosen by so many large companies that keep accurate cost figures. In every detail of construction it has been carefully planned and made for the work it has to do.

The design of the compression cham-

ber is an important factor in the effi-

ciency of the Ford engine. It is built to

allow free passage of gases through the

valves and to thoroughly mix the fuel

by producing turbulence within the cylinders during compression. The spark thus flashes quickly through the whole fuel charge, resulting in quieter and more effective engine performance. Other factors are the direct gravity gasoline feed, the specially designed carburetor, the new hot-spot manifold, aluminum pistons, chrome silicon alloy valves of larger diameter, statically and dynamically balanced crankshaft and flywheel, the simplicity of the electrical, cooling, lubrication, and fuel systems and accuracy in manufacturing.

from the tower. Thousands were grouped on the south and west shores of the lake. The night was ideal for the occasion. Everybody was in a good humor. Thousands of cars parked all over Wyman park held occufrom there. The state highway policemen gave efficient service. and there was no traffic tangle in an effort to get away after the close of the program.

It is difficult to place an estimate on the crowds that were present. Eight roads lead into Suilivan. Guy Kellar, sitting on his front porch, counted 650 cars headed south on route 32 after the program. There were perhaps as many, or more, leaving the city over the other roads, so a conservative estimate would be that over 5000 cars were here and many of these were crowded to capacity. The trains also brought many

from neighboring cities. No accidents were reported. There were no arrests. Everybody arrest, made his way home.

riage certificate and offered it to Eve, who took it and held it vaguely, as if she did not know what to do with it.

"Put it in your hand-bag." Hamilton said, and she followed the suggestion as mechanically as she had followed all the others. As they descended the steps leading to the street, Hamilton put

the soft pedal on himself with a firm foot. This was the big hour of his life. But it was not the big

hour in the life of the silent girl beside him, who still looked like one in a dream. He steadied his racing pulses, stopped a taxicab, and spoke his first words since the ceremony:

"It's a case of 'home, James,' isn't it? I mean," he added as he saw her inquiring look, "we'd better go right back to the Garland and meet what's there, hadn't we? Her silence seemed an acquiescence to the plan and he gave the cabman the direction. They entered the hotel lobby and a large man who had been seated in a lounging chair near the entrance, quietly A. J. Sexton. smoking a cigar that looked as if it had been made especially for

him, rose and came to meet them with an air of assurance. Eve stopped, but Hamilton,

with a murmured "One moment, please," swept her past the large man and into the elevator a few feet farther on.

"Go upstairs, dear," he quietly told ner. He put her suitcase in the elevator, gave the starting signal to the operator, and as the car began its ascent, turned back to the caller, whose look of assurance had given way to one of stunned surprise.

"My wife is very tired," Eric courteously explained. "She has been shopping all day, so I'm sure you will excuse her. Perhaps you will come in here," he went on, leading the way to the writing-

room, "and let me act for her in any matter that interests you." "My name is Henderson," the

stranger briefly announced; "Sam-He thought he was following the uel Henderson; and I'm from Chi-

dred mark this (Thursday) afternoon. Out on the streets it's up above the 100 mark. Wednesday it was up near 105. This is real summer heat. There is very little letup at night.

This heat affects people in different ways; some are weak, some are grouchy, some get lazy and indifferent, some get peevish and would like to blame somebody for the weather extreme. But in one particular they are all alikethey ooze sweat from every pore. Any pore in anybody's hide that does not respond liberally to this sort of weather must be permanently plugged up.

Some folks spend lots of time submerged to the neck in Wyman lake. Some say its cooler on the golf grounds, where the breezes sweep the sun-baked fairways.

Some people make much ado about how they suffer. They work
