# Feutz Of Paris **Awarded Contract**

Was Second Low in Bids Recently Opened. Chicago Firm Found faculty job and Miss Cummins' partment's Requirements.

Frank C. Feutz was on Friday awarded contract for paving the 8.58 miles of that section of route 133, from Lovington to Arthur. It was expected that work on the job will be commenced this week.

There has been some delay in letting this contract. When the bids were opened by the State highway department in May Jaicks Brothers of Chicago were low bidder, their figure being \$122,-258.66. The state took this bid under consideration. Before contracts are let, the contractors are usually investigated to see whether they have proper equipment and financial backing. Evidently the low bidder was not satisfactory.

The contract was let to Mr. Feutz whose bid was next to low. His figure was \$126,064.31.

All right of way has been cleared of mortgage releases, etc. The money is available to pay for land JENNIE MARGARET CUMMINS and damages. There is apparently nothing in the way to getting the participants for oratorical contests job started without delay.

Mr. Feutz is well known to trict engineer in charge of the way department and the contract-

## Spent \$50,000 to Get \$1,000,000

Buying right of way for Moultrie county hard roads is parted—if she goes shopping in what has taken the money out of the county treasury and New York. made this county hard up. That is about the only reason to blame for lack of funds.

The right of way on route 32 from the Shelby county line to the Piatt county line was all bought with county funds; so likewise was the right of way on the two county line roads-133 on the north and 169 on the west. The right ing to take \$46,000 for it. They of way and damage on that section of route 132 from the western limits of Sullivan to its present terminus past the Masonic Home also cost quite a bit. The damage on 132 from here if one can afford them. Sullivan to Dalton City was paid out of the county treasury; the payment for right of way on that route and on route 133 from Lovington to Arthur is being paid out of the county's share of the gas tax refund.

While the state of Illinois is seeking ways of spending the taxpayers' money, why not refund to the counties the fore the theatres open you can alsums that they have paid for hard road right of way? To Moultrie county, such repayment would be quite an asset. It would give the county plenty of money to operate on until taxes come in next year. Of course Illinois is not going to but they will be good shows. make such refund-not just vet.

Now let's look at this matter from the other side—every question has two sides, you know.

Moultrie county has no bonded indebtedness. It has paid as it went along. It is not really very hard up right now, as compared to some of the neighboring counties. It has received in jobs built, and now under contract, well over \$1,000,000 in hard roads and bridges. The state spent that million and we are asking it to spend more to finish the other day, leaving a million. Route 132 from the Masonic Home to Mattoon. We have received such improvement by spending about \$50,000 (the Novel Ticket Selling figure is approximate) of county funds. That does not look like a bad investment, does it?

SETTING THE WORLD RIGHT

Carle Conway, head of the Continental Can Company, has a customer in Massachusetts who makes cranberry sauce.

One day when Wall Street was thinking that the world was going to the dogs, Carle dropped in on this Yankee manufacturer and found him very serene.

They dined together, and after dinner the talk turned to world business conditions which, says Carle, "seem to have eliminated prohibition from conversation, so that there is that much to be said in favor of depression at least."

The cranberry man said: "During the war I was making cranberry sauce and we were not able to get sugar except at an exhorbitant price. "I did not think I was enough to help or harm the world's progress, but I did think I could nelp or harm my own business."

One thing which makes this depression seem more discouraging than others is the fact that all countries have been so closely knit together. # McCORMICK-DEERING HARVESTER-THRESHER and SERVICE

# -The Soundest Investment in the Combine Field!

URCHASE of a harvester-thresher is a very THRESHER SAVINGS INVESTMENT important investment. You are buying it for 10 years or more of harvesting. Each year will be exactly as important to you as this first year. That is why combine service is just as valuable and vital to you as the combine itself. Be sure you get both!

Buy a time-tried, efficient McCormick-Deering Harvester-Thresher, coupled with our assurance of branch house and dealer service-right here in your own community-to back you for the full life of your machine. If you can't count on both the machine and the permanence of the service when you buy you will make a costly mistake, no matter what price you pay.

Sometimes the lack of even a small part, of trifling cost in itself, may mean disaster at the height of the harvest-time rush - but not with McCormick-Deering. We maintain a service of great cash value, substantial stocks of genuine IHC repair parts, fast handling in any emergency, never-failing aid close at hand year after year. This assurance, which may in time save you many hundreds of dollars, can be had in the McCormick-Deering investment.

The McCormick-Deering Harvester-Thresher is the surest, soundest, most economical investment in the combine field today, and it is also the easiest to buy. Under the newly announced McCORMICK-DEERING HARVESTER- PLAN, you or any other responsible grain grower can buy a McCormick-Deering Harvester-Thresher now and meet your first payment after harvest with just a part of the savings made possible by the new machine-with two more years to pay the

Crop production cost figures compiled by McCormick - Deering users show savings of 20 cents or more per bushel, and show conclusively that the harvester-thresher will pay for itself in two or three years. Make these savings in your own crops and in custom work . . . and count on the permanence of McCormick-Deering service.

See the McCormick-Deering dealer in your own community for labor-saving power and machines essential to profitable handling of this year's crops. Keep in mind that McCormick - Deering Tractors-10-20, 15-30, and Farmall-and tractoroperated equipment may be had on terms arranged to help you begin at once cutting the costs of your operations and increasing your profits.

#### New York's Good Bargain

The land covered by Central park was not donated to the city of New York, but was purchased in 1856, the territory at that time being covered with shanties, boneboiling establishments, piggeries and pools, and very undesirable unsightly buildings. Three hnudred dwellings were removed. The price averaged \$7,500 an acre. present site covers 843 acres which were purchased at a cost of approximately \$6,348,950, only a fraction of the actual value of the land today.

#### Gambler's Reformation

The fate of gamblers or game-sters is an old theme. The redoubtable and productive John Timbs. in his "Century of Anecdote," tells of one great gambler who reformed and ever after detested cards. This reformation took place immediately after he had won in one evening large fortune at cards, on which he lived virtually till he died; his name was Col. Thomas Panton, and he lived in the days of the Restoration.-London Mail.

The Greatest Hero

The soldier named by Gen. John J. Pershing as the greatest individual hero of the World war earned a Congressional Medal and a bucketful of other decorations without suffering a scratch-but when he started to march into Germany after the fighting was ended, he broke his leg! Lieut, Samuel Woodfill, Sixtieth

infantry, was the soldier. His special feat of glory was the annihilation of something like 19, (or was it 22?) of the enemy. Also, the destruction of a series of machine gun nests in that busy sector of the Argonne north of Nantillois. Old Sam Woodfill's company

helped relieve the Eightieth division, early one foggy morning in October and, without any artillery as sistance whatever, launched an at-

Anyway, old Sam Woodfill seemed to realize the entire job was up to him. So, whether the total was 19 or 22, it is definitely known he got the last three of his kill with a pickax when he jumped into their emplacement and found that his pistol would only snap futilely which wasn't surprising, since he'd emptied all his clips long ago.

They made Woodfill a captain, over in the Sixtieth. He was in charge of a company when the post-Armistice march toward Germany began. "Not a scratch on him. Woodfill's a lucky guy," the doughboys said.

The first time the regiment pitched camp, Woodfill, who came into the army an enlisted man and went out the same way, challenged one of his soldiers to a wrestling bout. And just as we told you in the beginning the hero who won a Congressional Medal without so much as a scratch, promptly frac-

The First American Killed The first American citizen killed in the World war lost his life on February 27, 1915, more than two years before this country formally entered the conflict. He was Edward Mandell Stone, a native of Chicago, who was twenty-seven years old at the time of his death. Stone's sacrifice is remembered. Each year his death is the inspira-

tion for two separate ceremonies. The date of his passing, February 27, has been designated as the time when the Association of American Volunteers With the French Army, 1914-1917, each year reanimates the Eternal Flame on the tomb of France's Unknown Soldier at the Arc de Triomphe. On Memorial day every year the

American Legion directs a rite at the grave of Stone in the cemetery of Romilly-sur-Seine. One of the interesting features of this latter ceremony is that the French woman who, as volunteer nurse, wrote the last letter for Stone and was beside him when he died, is a participant. She is now schoolmistress of the school in La Villeneuve-au-

Stone lived in Paris and was in the American diplomatic service when the World war began. He enlisted in the French Foreign Legion, August 24, 1914, with the

first group of American citizens. Less than six months later—on February 15, 1915, while serving as a private in Battalion B, Second Regiment of the Foreign Legion, he was wounded so severely he died 12 days later.

Stone was in the trenches near Craonelle in the Aisne when wounded. He "went west" in the military hospital at Romilly-sur-Seine. The first American citizen to die received, posthumously, both the Croix de Guerre and Medaille Militaire. (©, 1930, Western Newspaper Union.)

Among papers seized by Americans from an Austrian regimental p. c. near the end of the war was a German corps order which highly praised the First Austrian division. The document mentioned especially the heroic and wonderful work against the Yankees by the Fifth Austrian regiment of infantry.

A short time later, the order was sent to the front to be read to troops of the Fifth Austrian infantry. And on this occasion even the youngest Austrian private of the rear ranks roared with laughter-for the document was read to them by an American captain as they loafed in an American prison The entire Fifth regiment, including 800 men and officers, had been captured by the Yanks.

Several days later a message was dropped from an American airplane for the German high command. It contained the reassuring information that members of the Fifth Austrian infantry would continue their good work-mainly in building roads and in other construction to which prisoners of war were commonly assigned.

Umbundu proverbs — Umbundu being the speech of the Ovimbundus-and the replies of Ovim bundu children, especially in Bible classes taught by missionaries, says the Boston Post, show conclusive ly that the native African has a intellect not to sneezed at, and proves also that children are children the world

Results of a recent Bible exam ination among a group of children threw astounding light upon Biblical history. One small boy finished a dramatic recital of the story of David and Goliath (the native African is a born actor) with the rather startling climax which, translated literally, was: "And the giant said to David, Go away, little boy, I like the

Since the great trade routes of the Middle ages. Frankfort-on-the-Main has played one of the most important parts in the commercial activities of all Europe, and for many years was the undisputed mistress of the international money market. However, her simplicity and quiet charm have not been af fected by her eminent position in international affairs. She reflects her ancient walls and towers in the clear waters of the Main with a modest dignity becoming a beloved monarch. It is no wonder she be guiled and endeared herself so keenly to the heart of Goethe, her native son, who was inspired to write his famous opera "Faust," in the first part of which old Frankfort breathes in almost every

#### Scallops Led to Water

The scallop season is not long and the persons who are employed in it must make the best of the time, with the result that in some sections of Long Island and New England the school sessions are curtailed in order to allow the children to do their part. But the government will not permit of any irregularity in the handling of this delicacy and recently a New England fish dealer was fined \$1,000 for "watering" scallops. When treated to an ordinary bath the that an unscrupulous dealer is really selling water at the price of scallops.

## Good Cheer

Good cheer is almost as essential to life as sunshine, air and water-

and is quite as plentiful. Cheerfulness has a dual value in life. First it helps you-then it helps you to help others-and it keeps on spreading out into the great throng of humanity, stirring the hearts of men as the gentle breeze stirs the leaves of the forest-returning again and again to you in its endless course and all the while making the heavy load lighter and the dark road brighter

for all. Good cheer is one of the biggest little things among all the elements of success.

## **Buddhistic Shrine**

The great Shwe Dagon pagoda is one of the best known places of worship in the East. It has a particular sanctity to Buddhists because it is credited with containing actual relics not only of Gautama but of the three Buddhas before him. The pagoda stands upon a mound partly natural and partly artificial. It is about 370 feet high and is profusely covered with gilt from base to summit. At the base of the pagoda hill are many monasteries.

SOLICITING COMMITTEES

WORK ON JULY 4 FUNDS The soliciting committees of the local Legion post were busy Thursday morning soliciting funds to defray the cost of the annual July 4th celebration. This matter has the endorsement and backing of the Community Club.

Sullivan is famous in this part of the nation for its July 4th celebrations and many thousands gather here for the big fireworks display at night on the shores of Wyman Lake.

The solicitors reports that they met with a very encouraging response from the business interests.
